Congenital Craniofacial Anomalies

Support the Ensuring Lasting Smiles Act (ELSA) to require health plans to cover treatment for patients with congenital craniofacial anomalies.

Why is federal congenital craniofacial anomalies legislation needed?

Congenital anomalies that are craniofacial conditions appear cosmetic, but they often impede daily functioning and may restrict a patient's ability to breathe, eat and speak. Corrective procedures allow these patients to grow and function normally.

Many private health insurers cover initial procedures for congenital craniofacial anomalies, but they frequently deny or delay subsequent procedures – which are widely considered part of a clinical standard of care - and include dental-related procedures involving orthodontia and dental implants because the procedures are deemed cosmetic or covered by dental plans.

Coverage limits in dental plans are much lower than those in health plans. As a result, patients may pay significant out-of-pockets costs for medically necessary treatment related to their condition, despite maintaining private health coverage.

Even in states that require health insurance coverage for congenital craniofacial anomalies, ERISA plans are exempt from those requirements. Federal legislation is essential to ensure coverage for all patients. **Approximately**

1 in every 33 babies*

born in the United States each year has a congenital anomaly, commonly referred to as a birth defect.

Examples of congenital craniofacial anomalies
– deformities in the growth of the bones and
soft tissue in the head and face – include cleft
lip and palate, skeletal and maxillofacial
deformities, facial paralysis, microtia,
hypodontia (absence of teeth) and
craniosynostosis.

AAOMS's ask of Congress

Support the Ensuring Lasting Smiles Act

- The bipartisan, bicameral Ensuring Lasting Smiles Act (ELSA) was introduced in the 117th Congress by Sens. Tammy Baldwin (D-Wis.) and Joni Ernst (R-Iowa) and Reps. Anna Eshoo (D-Calif.) and Drew Ferguson (R-Ga.). It passed the House April 2022 and will be reintroduced in the 118th Congress this spring.
- ELSA would close health benefit plan loopholes to ensure all group and individual health plans cover provider-directed medically necessary services as a result of a congenital anomaly. The bill explicitly excludes coverage for cosmetic surgeries.
- In preparation for ELSA's reintroduction in the 118th Congress, the bill sponsors and a broad coalition of ELSA supporting organizations have worked together to incorporate feedback and strengthen ELSA's language.
- More than 70 health professional and patient advocacy organizations support ELSA.
- To learn more or co-sponsor, contact the office of Sen. Baldwin, Sen. Ernst, Rep. Eshoo or Rep. Ferguson.
