serving both children and adults. The range of services we provide includes (but is not limited to) corrective jaw surgery, wisdom tooth removal, facial injury treatment and dental implant procedures. Highlights of this outstanding opportunity include: potential for transition into program director role; substantial incentive program; highly competitive benefits package including paid malpractice and relocation allowance. As Nebraska's only public academic health sciences center, UNMC is committed to the education of a 21st century healthcare workforce, to finding cures and treatments for devastating diseases, to providing the best care for patients, and to serve Nebraska and its communities through award-winning outreach. The successful candidate must be an MD/DO (or equivalent degree) who is board certified in oral and maxillofacial surgery. Candidates should have outstanding interpersonal skills along with enthusiasm for patient care, medical student and resident education. Applications are currently being accepted online at unmc.peopleadmin.com/postings/42661. Individuals from diverse backgrounds are encouraged to apply.

New York

The Department of Oral and Maxillofacial Surgery at Montefiore Medical Center is seeking applications for a full-time faculty position. Salary and rank will be commensurate with qualifications and experience. Responsibilities include clinical and didactic teaching of residents, trauma call coverage, scholarly activity and service. Candidates must be American Board of Oral and Maxillofacial Surgery-certified or active candidates for board certification. Applicants must be able to obtain a New York state dental license and be a graduate of a CODA-approved American or Canadian dental school/oral and maxillofacial surgery residency program. Montefiore is an equal opportunity/affirmative action employer. Interested candidates should send a letter of intent and curriculum vitae to Dr. Jairo Bastidas, Program Director, email: jbastida@montefiore.org.

Pennsylvania

Temple University Kornberg School of Dentistry is seeking applicants for a full-time faculty position in the clinical-track at an assistant or associate professor level for the Department of Oral and Maxillofacial Pathology, Medicine and Surgery. Major responsibilities of this position will include didactic and clinical teaching at the pre- and postdoctoral levels, in addition to direct patient care at the Temple University Kornberg School of Dentistry and its affiliated sites. The applicants must have a DDS/DMD from a program accredited by the Commission on Dental Accreditation (CODA) of the American Dental Association and must have successfully completed advanced training in oral and maxillofacial surgery at a CODA-accredited institution. Applicants must be eligible for full

licensure in the Commonwealth of Pennsylvania, certified by the American Board of Oral and Maxillofacial Surgery or be a candidate for board certification. Expertise in predoctoral education and full-scope of oral and maxillofacial surgery with emphasis on office anesthesia, sleep apnea and orthognathic surgery are highly desirable. Pursuit of scholarly activities is strongly encouraged. Salary and rank will be commensurate with experience and qualifications. Temple University is an equal opportunity/affirmative action employer. Women and minorities are encouraged to apply. For confidential consideration, interested individuals should email a cover letter, curriculum vitae and three references to: Mehran Hossaini, DMD, mhossaini@temple.edu, Professor and Chair, Department of Oral and Maxillofacial Pathology, Medicine, Surgery, Temple University, Kornberg School of Dentistry, 3223 North Broad Street, Philadelphia, PA 19140.

Tennessee

The Department of Oral and Maxillofacial Surgery at the University of Tennessee Health Science Center is seeking applicants for a full-time faculty position. Salary and rank will be commensurate with qualifications and experience. Responsibilities include clinical and didactic teaching of residents and dental students, trauma call coverage, scholarly activity and service. Candidates must be American Board of Oral and Maxillofacial Surgery-certified or active candidates for board certification. Applicants must be able to obtain a Tennessee dental license. The University of Tennessee is an EEO/AA/Title VI/Title IX/Section 504/ADA/ADEA institution in the provision of its education and employment programs and services. Interested candidates should send a letter of intent, curriculum vitae and two letters of recommendations to: Dr. Larry Weeda, Jr., Professor and Chairman, Department of Oral and Maxillofacial Surgery, 875 Union Avenue, Memphis, TN 38163.

Washington

The Department of Oral and Maxillofacial Surgery (OMS) at the University of Washington is searching for a full-time faculty member at the rank of clinical assistant or associate professor, salaried (non-tenure). Minimum requirements include a DMD/DDS degree from an ADA-accredited institution or equivalent and completion of a residency program in oral and maxillofacial surgery. MD or secondary degree in a related field is preferred. Candidates must be ABOMS-eligible or qualified and eligible for dental licensure in the state of Washington. Salary and academic rank will be commensurate with qualifications and experience. The Department seeks candidates who can engage productively in clinical activities as part of the faculty practice and contribute to the Department's research mission. The ideal candidate will practice the full scope of oral and maxillofacial surgery with a proven track record of building a clinical practice and a niche clinical interest, e.g. trauma, microvascular reconstruction, orthognathic, TMJ. The candidate will demonstrate a personal

commitment to the goals and ideals of academic service including a desire to work in a teaching environment, collaborate in a dialectic culture and observe evidence-based clinical practices. Interested, qualified applicants should submit a personal statement along with a CV, the names and addresses of three references to Ms. Bridget Doyle (badw@uw.edu). Position is open until filled. For questions, please contact: Thomas B. Dodson, DMD, MPH, FACS, Professor and Chair, Department of Oral and Maxillofacial Surgery, email address: tbodson@uw.edu.

Fellowships CODA

Michigan

The University of Michigan is offering a one-year fellowship for recent OMS graduates. The fellowship is sponsored by the section of Oral and Maxillofacial Surgery and will provide extensive experience in major operative room cases including orthognathic, TMJ, trauma and pediatric surgery. The fellowship aims to enhance skills in diagnosis and treatment for dentofacial disorders, obstructive sleep apnea, salivary gland disorders, minimally invasive TMJ surgery, autogenous and alloplastic TMJ total joint replacement, maxillofacial pathology, as well as cleft and craniofacial disorders. The fellow will gain extensive experience in the use and application of new technologies such as virtual planning, custom implants and surgical navigation. In addition, the fellow will participate in collaborative team-based care in the management of obstructive sleep apnea, juvenile idiopathic arthritis affecting the TMJ, and orofacial cleft conditions. The fellow will have the opportunity to participate in clinical research and publication of papers. Applicants must be eligible for a Michigan state dental license. Please submit a letter of interest and curriculum vitae to Sharon Aronovich [saronovi@med.umich.edu] or Sean P. Edwards [seanedwa@med.umich.edu].

Fellowships Non-CODA

Alabama

A one-year post graduate fellowship in orthognathic surgery & pediatric surgery is offered to recent graduates of accredited oral and maxillofacial surgery programs. The fellowship is sponsored by the University of Alabama at Birmingham Department of Oral and Maxillofacial Surgery. If accepted, the fellow will be required to obtain an active medical or dental license in the state of Alabama. A clinical appointment in the Department of Oral & Maxillofacial Surgery will be obtained. The philosophy of the fellowship is to enhance skills in facial esthetic analysis; assessment of head and neck functions, including the upper airway; the patient-doctor relationship; and surgical skills. Clinical activities primarily revolve around the evaluation and treatment of dentofacial deformities, the airway, the secondary cleft lip and

palate issues. This intensive fellowship program will focus on facial cosmetics, reconstruction, and some amount of trauma, TMJ and complex dental implants. Each patient is followed through their initial consultation, further evaluation, collaborative treatment, immediate preoperative workup, operation, postoperative care and long-term follow up. The fellow will work closely with Dr. Waite and other select faculty, evaluating and managing the patient through all phases of care. There will be an opportunity for clinical research and publication of papers. A salary allowance is provided. Send inquiries to Dr. Peter Waite, MPH, DDS, MD, FACS; email pwaite@uab.edu or phone 205-934-4345.

California

UCSF-Fresno Department of Oral and Maxillofacial Surgery offers a 24-month fellowship in Head and Neck Oncology and Microvascular Reconstruction. There is one fellow position per year. Clinical activities include: head and neck cancer and benign tumor surgery – neck dissections, resections such as glossectomy, mandibulectomy, maxillectomy, orbital exenteration, etc.; trans Oral Robotic Surgery and skull base surgery; airway management – tracheostomies and its variations including emergency airway management; reconstructive surgery of major oral/head and neck defects – microvascular free flaps, pedicled and other conventional flaps to reconstruct complex composite head, face and neck defects; radiation and medical oncology – one month rotating with radiation oncology, and one rotating with medical oncology to fully comprehend the multidisciplinary aspects of care for the head and neck cancer patient; craniomaxillofacial trauma – also will be involved in trauma ranging from frontal sinus/skull base fractures to penetrating tracheoesophageal injuries. Large avulsive soft tissue injury management also is included. The fellow will act in a teaching capacity supervising residents in the surgical treatment of craniomaxillofacial trauma; sleep apnea surgery – not officially part of the fellowship, the fellow will have involvement in the work-up and treatment of sleep apnea patients; research activities – complete at least 2 clinical research papers related to head and neck oncology and reconstructive surgery or other topics of interest. Interested applicants please email Breana Dennie, bdennie@fresno.ucsf.edu. Include a CV, photo, two letters of recommendation and a letter describing your intentions/plans after fellowship training. If additional questions, also can email Brian Woo, DDS, MD, bwoo@communitymedical.org.

Florida

A fellowship in cleft and craniofacial surgery is available at the Florida Craniofacial Institute. We are now taking applications for July 2021 positions. This one-year fellowship is in a private practice environment in Tampa, Fla., and the focus is congenital craniofacial anomalies. The primary goal of the practice's cleft lip/palate and craniofacial fellowship is to educate and provide additional surgical training in the management and

treatment of patients with craniofacial and/or facial differences. The fellow will work in conjunction with the cleft lip/palate and craniofacial team and will gain comprehensive experience and instruction in team-focused treatment. For information on the Florida Craniofacial Institute, visit www.FLcranio.com. Please email CV to admin@flcranio.com.

Florida

The Pediatric Maxillofacial and Craniofacial Surgery Fellowship Program at University of Florida – Jacksonville, Department of Oral and Maxillofacial Surgery is offering a one-year postgraduate fellowship commencing July 1, 2019, and ending June 30, 2020. This fellowship encompasses all aspects of pediatric maxillofacial and craniofacial procedures (15 years old and younger). In conjunction with the attending, our fellows work to provide comprehensive treatment of pediatric soft and hard tissues, and abnormalities of the maxillofacial and craniofacial region. This includes primary repair of cleft lip and palate as well as transcranial procedures. In addition, the fellow will work alongside a multidisciplinary team of specialists in head and neck oncology, ENT, plastic surgery and other disorders of the maxillofacial region in a dynamic surgical and clinical setting. Our fellows also have the opportunity to conduct research projects at both UF Jacksonville and Wolfson Children's Hospital. The fellow chosen for this position will be on-call for cases operated on by the pediatric craniomaxillofacial service. It is expected that the fellow will also cover the pediatric cranial and maxillofacial trauma, as well as PICU and NICU consults from UF Jacksonville and Wolfson Children's Hospital. The fellow will attend clinic one half-day per week along with a full multidisciplinary cleft and craniofacial clinic two times per month. Interested candidates should contact 904-244-3689 or submit a letter of interest and CV via email to Barry Steinberg, MD, PhD, DDS, FACS, at barry.steinberg@jax.ufl.edu.

Massachusetts

Junior faculty/fellowship position. Massachusetts General Hospital, Department of Oral and Maxillofacial Surgery. Massachusetts General Hospital (Partners Education Committee approved), announces the offering of a 2-year fellowship in endoscopic oral and maxillofacial surgery under the direction of Dr. Joseph McCain, Program Director. The goal of this unique educational opportunity is to train surgeons in the skills of endoscopic surgery of the maxillofacial region including temporomandibular joint (arthroscopy), salivary gland sialoendoscopy, trauma repair and reconstruction. During the two-year fellowship period, scholarly activity and education on translational research, clinical trials, prospective and retrospective studies will be available. Great opportunity for clinical outcomes studies and translational bench work will be provided. The fellow will practice as an attending and gain experience in an academic "protected"

environment. They will be expected to function as a primary Attending for Level I Trauma, elective OMS and resident case coverage. They are fully expected to teach residents endoscopy and general OMS. Massachusetts Dental License is required. Interested candidates should submit a letter of interest, curriculum vitae and two letters of recommendation to Joseph P. McCain, DMD, FACS, Director of Minimally Invasive and Temporomandibular Joint Surgery, Massachusetts General Hospital, 55 Fruit Street, Warren 1201, Boston, MA 0211.

Massachusetts

The Department of Plastic and Oral Surgery and Boston Children's Hospital is pleased to offer a one-year fellowship in Pediatric Craniomaxillofacial Surgery available July 2020. The fellowship provides a unique opportunity for an additional surgical training in pediatric oral and maxillofacial surgery as well as in the interdisciplinary management of children with cleft and craniofacial anomalies; temporomandibular joint disease; head and neck pathology; and vascular anomalies. Candidates must have completed an OMS residency. Please submit a letter of interest and curriculum vitae to: Bonnie Padwa, DMD, MD, Department of Plastic and Oral Surgery, Boston Children's Hospital, 300 Longwood Ave., Boston, MA 02115; email bonnie.padwa@childrens.harvard.edu.

Missouri (St. Louis)

2020-2021 oral and maxillofacial fellowship. Sponsored by The Oral Facial Surgery Institute (www.ofsinstitute.com) and accredited by The Department of Graduate Medical Education at Mercy. This advanced accredited opportunity is a year of hospital-based oral and maxillofacial surgery centered at Mercy, a Level I trauma center in suburban St. Louis. This intensive fellowship program will focus on facial cosmetic, reconstructive, orthognathic, and TMJ surgery, facial trauma and complex dental implantology. Candidates must have completed an approved OMS residency. Missouri dental and/or medical licensure is required. Salary, benefits and continuing education allowance are included. Please address curriculum vitae and letters of interest to: Dr. Michael W. Noble, chairman and director of oral and maxillofacial surgery, Attention: Scott E. Graham, MHA, FACMPE, FAADOM, Chief Operating Officer, 621 South New Ballas Road, Suite 16A, St. Louis, MO 63141, phone 314-251-6725, fax 314-251-6726, email scott@ofsinstitute.com or visit our website at www.ofsinstitute.com.

Nationwide

Want a career in cosmetic surgery? Get trained by the best. The American Academy of Cosmetic Surgery certified Facial and General Cosmetic Surgery Fellowships offer one-year, post-residency, hands-on training. Limited slots across the US.

Fellowships Non-CODA

Accredited *continued from previous page*

Must have completed a surgical residency in ACGME, AOA-BOS, Royal College of Physicians/ Surgeons of Canada, or ADA program. Apply at cosmeticsurgery.org or 312-265-3735.

North Carolina

The fellowship will provide extensive exposure and advanced clinical training for oral and maxillofacial surgeons in orthognathic surgery, temporomandibular joint surgery and complex implant reconstruction. The clinicians completing the fellowship throughout its 12-year history have subsequently applied their experience to both academic and private practice settings. A substantial stipend is offered. The OMS selected for this position must be able to obtain either an unrestricted North Carolina dental license or North Carolina medical license, obtain hospital privileges and be available from July 1, 2020, through June 30, 2021. The candidate will have extensive exposure to consultations, diagnosis, interdisciplinary treatment planning, treatment and postoperative management of a wide array of patients. It is expected that the candidate will be involved with several hundred major surgical cases. Carolinas Center for Oral and Facial Surgery (CCOFS) is located in Charlotte, N.C. CCOFS is a 14-surgeon practice with six offices in N.C. and two in S.C., with most possessing OR facilities and accredited by the AAAHC. The surgeons are well-known locally and nationally in the OMS specialty. To apply, an application must be completed and returned by Aug. 31 of each year. The selection will be made on Dec. 31 of each year in order to allow time for licensure. Interested candidates can email dketola@mycenters.com for an application. For more information on the practice, log on to mycenters.com.

North Carolina

The Craniomaxillofacial Trauma and Reconstructive Surgery Fellowship at Duke University offers a one- to two-year clinical and research experience in complex craniomaxillofacial reconstructive surgery for fully trained craniomaxillofacial surgeons who desire to be academic leaders in craniomaxillofacial traumatology. The training program is based in the Duke University Department of Surgery's Division of Plastic, Maxillofacial, and Oral Surgery. The fellowship offers a broad-based experience in craniomaxillofacial surgical traumatology and facial reconstructive surgery at the world-renowned Duke University Medical Center. The focus of the fellowship will be on the utilization of advanced surgical techniques for comprehensive craniomaxillofacial reconstruction, including intraoperative computer navigation, patient specific implant fabrication and complex facial reconstructive surgery after traumatic injury or pathologic resection. For more information, contact colleen.mcdowell@duke.edu.

Oregon

The Head and Neck Surgical Associates (HNSA) and the Head and Neck Institute (HNI) are offering as 12-month fellowship in Advanced Craniomaxillofacial and Trauma Surgery (ACMF-Trauma). We are now accepting interested candidates for the 2020-2021 academic year. Outstanding opportunity for an Oral and Maxillofacial Surgeon to join a full-scope, hospital-based, group, private practice that also sponsors a nationally recognized, multi-focused Fellowship Training Program. The Oral Facial Surgery Institute is a professionally managed practice with an excellent reputation and a vast network of regional referrals rendering complex care to a large region of the Midwest. Our facilities include seven private practice offices in outstanding, closely surrounding communities. All of our surgeons work directly with our fellows in an academic/private practice environment. We pride ourselves in providing superb, comprehensive care to our patients. St. Louis is a delightful city with a small-town feel and an excellent community to raise a family. No buy-in necessary for the right person. For confidential consideration, interested individuals should send a letter of intent and CV to Oral Facial Surgery Institute Attn: Michael W. Noble, DMD, Chairman of the Division of Oral and Maxillofacial Surgery and/or Scott Graham, MHA, FAADOM, FACMPE, Chief Executive Officer, 621 South New Ballas Rd., Suite 16A, St. Louis, MO 63141; phone 314-251-6725; fax 314-251-6726; email mwnoble@aol.com or scott@ofsinstitute.com; www.ofsinstitute.com.

Nevada

OMFS needed for busy, full-scope oral and maxillofacial surgery group practice in Las Vegas, Nev. We have two full-time offices (one in Henderson, one in NW Las Vegas). Would you enjoy working in a team environment where camaraderie is high, ethics and quality of care are paramount, and the sun is always shining? Ideal candidate will have excellent communication skills, have a great work ethic and a willingness to deliver stellar patient service. Great opportunity to accelerate your career path. We've been told we provide the most dental implants and all-on-4 cases west of the Mississippi. Trauma and orthog cases are seen here as well. Excellent salary/benefits package. Buy-in after first year (we are looking for someone who seeks partnership status). See our website at nofslv.com for more information about our practice and surgeons. Call Lorraine at 702-360-8918 or email lorraine@nofslv.com for more information.

New Jersey

A fabulous opportunity is available due to the forthcoming retirement of a senior partner. A full-time position fast tracking to a well-defined equal partnership is planned to provide a career with long-term stability. We have a well-established, ever-evolving practice that is 32 years old. It consists of three progressive doctors of excellent reputation who encourage a collegial relationship. We are committed to quality patient care founded upon a very large, dependable referral base. Practice emphasis is on dentoalveolar surgery, third molars, implants and office anesthesia. There is unlimited potential to expand the scope of our practice if desired. Our three offices are state-of-the-art

and well-equipped with digital imaging, CBCT and intraoral scanning. Please email resumes to tkolb@coastaloralsurgerynj.com.

New Jersey

A well-established and respected OMS practice in northern New Jersey has an exciting opportunity for a full-time oral surgeon. We are seeking a well-trained, highly motivated candidate with excellent surgical and interpersonal skills for a full-time associate position. Board-certified or active candidate for board certification preferred. Opportunity for full-scope practice in our state-of-the-art modern, and well-equipped facility. Competitive compensation package with great benefits. Please email ecaiola422@gmail.com.

New Jersey

A well-established and respected OMS practice with two locations in central New Jersey (close to New York City and Philadelphia – with their illustrious educational, cultural, and recreational offerings), seeking a well-trained, highly-motivated candidate with excellent surgical and interpersonal skills for full-time and part-time associate positions with partnership track. Board-certified or active candidate for board certification preferred. There is an opportunity for full-scope practice at both locations. Both office locations are state-of-the-art, modern and well-equipped facilities. We offer a competitive compensation package with great benefits. Please email CV to dr.edkozlovsky@gmail.com.

New Jersey

If you are motivated and understand what it takes to cultivate the optimal patient experience each and every time, please contact us. We are a well-established and still rapidly expanding full-scope, multi-office practice minutes from NYC with a focus on office-based oral surgery and affiliations at some of the region's most prestigious hospitals. We are the official oral surgeons of the New Jersey Devils, and we are seeking a full-time BC/BE partnership-minded associate to join our team with huge potential for more. info@riversideoralsurgery.com

New Jersey

Looking for an enthusiastic oral surgeon to join a highly reputable private practice with multiple locations throughout the beautiful suburban areas of Northern New Jersey and near the Jersey Shore. Randolph Center for Oral & Maxillofacial Surgery is a comprehensive provider for oral and maxillofacial surgery with affiliations at Morristown Medical Center and New York Presbyterian Weill-Cornell Medical Center. This well-established, growing practice now has a great opportunity for a new and upcoming oral surgeon looking to gain experience at a state-of-the-art, full-scope practice. Randolph

Oral Surgery is offering a full-time position to a board-eligible surgeon – an excellent salary and benefits package is included in this exciting opportunity! If interested in this position, please fax resumes to 973-328-3405. We are looking forward to hearing from you soon!

New Jersey

PT oral surgeon position available (2 days/week) for well-respected, high-end and modern OMFS practice in NNJ, approximately 45 minutes west of NYC. No call required, and possibility for FT transition for the right individual. Production-based position, malpractice coverage and daily minimum. Respond to AAOMS Classified Box A-060319.

New Jersey

Associate position available for three practice locations in southern New Jersey. Board-certified/board-eligible preferred. Part-/full-time available. Interest in partnership transitioning into ownership preferred. Practice locations: Linwood, N.J.; Cape May Courthouse, N.J.; and Maple Shade, N.J. Call 609-350-5233 or email benaifer3@hotmail.com.

New York

We are seeking an OMFS, single- or double-degree candidate, who is board-certified or eligible. The group is focused on implants, dentoalveolar, bone grafting, third molars, pediatrics with multiple opportunities for major surgery, including orthognathic treatment. The ideal candidate should be skilled and enthusiastic with an interest in being a partner in the future. We are primarily a fee-for-service practice recently expanding by participating in several insurance plans. Interested candidates, please respond to: AAOMS Classified Box A-050119.

New York (Long Island)

Seeking energetic person to join a unique, multi-doctor practice. Association leading to partnership for motivated, personable and ethical OMS. Our group is office-/hospital-based and provides a full scope of oral and maxillofacial surgery, including cosmetic procedures. A full-time esthetician also provides nonsurgical cosmetic services in our medical spa. We offer an excellent salary plus a comprehensive benefit package that includes malpractice, health, life insurance, 401(k) and profit sharing. Reply to AAOMS Classified Box A-4442.

New York (Long Island)

Long-standing, established Nassau County practice seeking a motivated, ethical, hard-working and highly skilled full-time OMS. Reply to AAOMS Classified Box A-4416.

New York (Saratoga Springs)

Outstanding opportunity to join a busy, multi-location, three-surgeon OMS practice in Saratoga Springs, N.Y. Saratoga is an excellent place to live and work with a vast array of cultural and recreational activities. Association leading to partnership for a motivated oral and maxillofacial surgeon who possesses top skills and displays excellent interpersonal skills. Practice is office-based, full-scope dentoalveolar and implant surgery under general anesthesia. Orthognathic, reconstruction, cleft lip and palate, pathology, and TMJ cases are available in the office and hospital settings. We offer a competitive salary plus a comprehensive benefits package that includes malpractice, health, life insurance, 401(k) and profit sharing. Send resumes to dwhitacre@scomsa.com.

North Carolina

Oral and maxillofacial surgeon desired for well-established, flourishing oral surgery and dental implant practice. The practice has the ability to perform the full scope of oral and maxillofacial procedures. The facility is equipped with state-of-the-art equipment and is due to expand. Applicant should be board-certified/eligible, possess excellent interpersonal skills, work ethic and have a compassionate patient care philosophy. Candidate also should be dedicated both professionally and socially to develop presence within the dental and medical community. Available technologies include cone-beam CT, multiple implant systems, PRF centrifuge systems, piezosurgery and general anesthesia capabilities. The office is located one block from a regional medical center. The practice is located in the greater Fayetteville region of North Carolina and is located 1 hour from Raleigh and 1 1/2 hours to the North Carolina coast and serves over 10+ surrounding counties. Please email resume to bspell@sandhillsoms.com.

North Dakota

Well-established solo practice in Fargo, N.D. is seeking a board-eligible/-certified single- or dual-degree oral and maxillofacial surgeon to join our practice. It is an economically growing region in the upper Midwest. The practice, at present, is full-scope. I have a very large implant practice and there is growth available in all aspects of the specialty. The practice draws from approximately a one hundred mile radius and from about 80-100 possible referral sources. Salary will be negotiable and competitive as well as a two-year associate contract leading to buy-in. Resumes can be mailed to the office (Attention: Amy) or email to amy@prairieoralsurgery.com. Feel free to visit our website at prairieoralsurgery.com.

EXPAREL®

(bupivacaine liposome injectable suspension)

Brief Summary
(For full prescribing information refer to package insert)

INDICATIONS AND USAGE

EXPAREL is indicated for single-dose infiltration in adults to produce postsurgical local analgesia and as an interscalene brachial plexus nerve block to produce postsurgical regional analgesia.

Limitation of Use: Safety and efficacy has not been established in other nerve blocks.

CONTRAINDICATIONS

EXPAREL is contraindicated in obstetrical paracervical block anesthesia. While EXPAREL has not been tested with this technique, the use of bupivacaine HCl with this technique has resulted in fetal bradycardia and death.

WARNINGS AND PRECAUTIONS

Warnings and Precautions Specific for EXPAREL

As there is a potential risk of severe life-threatening adverse effects associated with the administration of bupivacaine, EXPAREL should be administered in a setting where trained personnel and equipment are available to promptly treat patients who show evidence of neurological or cardiac toxicity.

Caution should be taken to avoid accidental intravascular injection of EXPAREL. Convulsions and cardiac arrest have occurred following accidental intravascular injection of bupivacaine and other amide-containing products.

Avoid additional use of local anesthetics within 96 hours following administration of EXPAREL.

EXPAREL has not been evaluated for the following uses and, therefore, is not recommended for these types of analgesia or routes of administration.

- epidural
- intrathecal
- regional nerve blocks other than interscalene brachial plexus nerve block
- intravascular or intra-articular use

EXPAREL has not been evaluated for use in the following patient population and, therefore, it is not recommended for administration to these groups.

- patients younger than 18 years old
- pregnant patients

The potential sensory and/or motor loss with EXPAREL is temporary and varies in degree and duration depending on the site of injection and dosage administered and may last for up to 5 days as seen in clinical trials.

ADVERSE REACTIONS

Clinical Trial Experience

Adverse Reactions Reported in Local Infiltration Clinical Studies

The safety of EXPAREL was evaluated in 10 randomized, double-blind, local administration into the surgical site clinical studies involving 823 patients undergoing various surgical procedures. Patients were administered a dose ranging from 66 to 532 mg of EXPAREL. In these studies, the most common adverse reactions (incidence greater than or equal to 10%) following EXPAREL administration were nausea, constipation, and vomiting. The common adverse reactions (incidence greater than or equal to 2% to less than 10%) following EXPAREL administration were pyrexia, dizziness, edema peripheral, anemia, hypotension, pruritus, tachycardia, headache, insomnia, anemia postoperative, muscle spasms, hemorrhagic anemia, back pain, somnolence, and procedural pain.

Adverse Reactions Reported in Nerve Block Clinical Studies

The safety of EXPAREL was evaluated in four randomized, double-blind, placebo-controlled nerve block clinical studies involving 469 patients undergoing various surgical procedures. Patients were administered a dose of either 133 or 266 mg of EXPAREL. In these studies, the most common adverse reactions (incidence greater than or equal to 10%) following EXPAREL administration were nausea, pyrexia, and constipation.

The common adverse reactions (incidence greater than or equal to 2% to less than 10%) following EXPAREL administration as a nerve block were muscle twitching, dysgeusia, urinary retention, fatigue, headache, confusional state, hypotension, hypertension, hypoesthesia oral, pruritus generalized, hyperhidrosis, tachycardia, sinus tachycardia, anxiety, fall, body temperature increased, edema peripheral, sensory loss, hepatic enzyme increased, hiccups, hypoxia, post-procedural hematoma.

Postmarketing Experience

These adverse reactions are consistent with those observed in clinical studies and most commonly involve the following system organ classes (SOCs): Injury, Poisoning, and Procedural Complications (e.g., drug-drug interaction, procedural pain), Nervous System Disorders (e.g., palsy, seizure), General Disorders And Administration Site Conditions (e.g., lack of efficacy, pain), Skin and Subcutaneous Tissue Disorders (e.g., erythema, rash), and Cardiac Disorders (e.g., bradycardia, cardiac arrest).

DRUG INTERACTIONS

The toxic effects of local anesthetics are additive and their co-administration should be used with caution including monitoring for neurologic and cardiovascular effects related to local anesthetic systemic toxicity. Avoid additional use of local anesthetics within 96 hours following administration of EXPAREL.

Patients who are administered local anesthetics may be at increased risk of developing methemoglobinemia when concurrently exposed to the following drugs, which could include other local anesthetics:

Examples of Drugs Associated with Methemoglobinemia:

Class	Examples
Nitrates/Nitrites	nitric oxide, nitroglycerin, nitroprusside, nitrous oxide
Local anesthetics	articaïne, benzocaine, bupivacaine, lidocaine, mepivacaine, prilocaine, procaine, ropivacaine, tetracaine
Antineoplastic agents	cyclophosphamide, flutamide, hydroxyurea, ifosfamide, rasburicase
Antibiotics	dapsone, nitrofurantoin, para-aminosalicylic acid, sulfonamides
Antimalarials	chloroquine, primaquine
Anticonvulsants	Phenobarbital, phenytoin, sodium valproate
Other drugs	acetaminophen, metoclopramide, quinine, sulfasalazine

Bupivacaine

Bupivacaine HCl administered together with EXPAREL may impact the pharmacokinetic and/or physicochemical properties of EXPAREL, and this effect is concentration dependent. Therefore, bupivacaine HCl and EXPAREL may be administered simultaneously in the same syringe, and bupivacaine HCl may be injected immediately before EXPAREL as long as the ratio of the milligram dose of bupivacaine HCl solution to EXPAREL does not exceed 1:2.

Non-bupivacaine Local Anesthetics

EXPAREL should not be admixed with local anesthetics other than bupivacaine. Nonbupivacaine based local anesthetics, including lidocaine, may cause an immediate release of bupivacaine from EXPAREL if administered together locally. The administration of EXPAREL may follow the administration of lidocaine after a delay of 20 minutes or more. There are no data to support administration of other local anesthetics prior to administration of EXPAREL.

Other than bupivacaine as noted above, EXPAREL should not be admixed with other drugs prior to administration.

Water and Hypotonic Agents

Do not dilute EXPAREL with water or other hypotonic agents, as it will result in disruption of the liposomal particles

USE IN SPECIFIC POPULATIONS

Pregnancy

Risk Summary

There are no studies conducted with EXPAREL in pregnant women. In animal reproduction studies, embryo-fetal deaths were observed with subcutaneous administration of bupivacaine to rabbits during organogenesis at a dose equivalent to 1.6 times the maximum recommended human dose (MRHD) of 266 mg. Subcutaneous administration of bupivacaine to rats from implantation through weaning produced decreased pup survival at a dose equivalent to 1.5 times the MRHD [see Data]. Based on animal data, advise pregnant women of the potential risks to a fetus.

The background risk of major birth defects and miscarriage for the indicated population is unknown. However, the background risk in the U.S. general population of major birth defects is 2-4% and of miscarriage is 15-20% of clinically recognized pregnancies.

Clinical Considerations

Labor or Delivery

Bupivacaine is contraindicated for obstetrical paracervical block anesthesia. While EXPAREL has not been studied with this technique, the use of bupivacaine for obstetrical paracervical block anesthesia has resulted in fetal bradycardia and death.

Bupivacaine can rapidly cross the placenta, and when used for epidural, caudal, or pudendal block anesthesia, can cause varying degrees of maternal, fetal, and neonatal toxicity. The incidence and degree of toxicity depend upon the procedure performed, the type, and amount of drug used, and the technique of drug administration. Adverse reactions in the parturient, fetus, and neonate involve alterations of the central nervous system, peripheral vascular tone, and cardiac function.

Data

Animal Data

Bupivacaine hydrochloride was administered subcutaneously to rats and rabbits during the period of organogenesis (implantation to closure of the hard plate). Rat doses were 4.4, 13.3, and 40 mg/kg/day (equivalent to 0.2, 0.5 and 1.5 times the MRHD, respectively, based on the BSA comparisons and a 60 kg human weight) and rabbit doses were 1.3, 5.8, and 22.2 mg/kg/day (equivalent to 0.1, 0.4 and 1.6 times the MRHD, respectively, based on the BSA comparisons and a 60 kg human weight). No embryo-fetal effects were observed in rats at the doses tested with the high dose causing increased maternal lethality. An increase in embryo-fetal deaths was observed in rabbits at the high dose in the absence of maternal toxicity.

Decreased pup survival was noted at 1.5 times the MRHD in a rat pre- and post-natal development study when pregnant animals were administered subcutaneous doses of 4.4, 13.3, and 40 mg/kg/day buprenorphine hydrochloride (equivalent to 0.2, 0.5 and 1.5 times the MRHD, respectively, based on the BSA comparisons and a 60 kg human weight) from implantation through weaning (during pregnancy and lactation).

Lactation

Risk Summary

Limited published literature reports that bupivacaine and its metabolite, pipercoloylidiide, are present in human milk at low levels. There is no available information on effects of the drug in the breastfed infant or effects of the drug on milk production. The developmental and health benefits of breastfeeding should be considered along with the mother's clinical need for EXPAREL and any potential adverse effects on the breastfed infant from EXPAREL or from the underlying maternal condition.

Pediatric Use

Safety and effectiveness in pediatric patients have not been established.

Geriatric Use

Of the total number of patients in the EXPAREL local infiltration clinical studies (N=823), 171 patients were greater than or equal to 65 years of age and 47 patients were greater than or equal to 75 years of age. Of the total number of patients in the EXPAREL nerve block clinical studies (N=531), 241 patients were greater than or equal to 65 years of age and 60 patients were greater than or equal to 75 years of age. No overall differences in safety or effectiveness were observed between these patients and younger patients. Clinical experience with EXPAREL has not identified differences in efficacy or safety between elderly and younger patients, but greater sensitivity of some older individuals cannot be ruled out.

Hepatic Impairment

Amide-type local anesthetics, such as bupivacaine, are metabolized by the liver. Patients with severe hepatic disease, because of their inability to metabolize local anesthetics normally, are at a greater risk of developing toxic plasma concentrations, and potentially local anesthetic systemic toxicity. Therefore, consider increased monitoring for local anesthetic systemic toxicity in subjects with moderate to severe hepatic disease.

Renal Impairment

Bupivacaine is known to be substantially excreted by the kidney, and the risk of toxic reactions to this drug may be greater in patients with impaired renal function. This should be considered when performing dose selection of EXPAREL.

OVERDOSAGE

Clinical Presentation

Acute emergencies from local anesthetics are generally related to high plasma concentrations encountered during therapeutic use of local anesthetics or to unintended intravascular injection of local anesthetic solution.

Signs and symptoms of overdose include CNS symptoms (perioral paresthesia, dizziness, dysarthria, confusion, mental obtundation, sensory and visual disturbances and eventually convulsions) and cardiovascular effects (that range from hypertension and tachycardia to myocardial depression, hypotension, bradycardia and asystole).

Plasma levels of bupivacaine associated with toxicity can vary. Although concentrations of 2,500 to 4,000 ng/mL have been reported to elicit early subjective CNS symptoms of bupivacaine toxicity, symptoms of toxicity have been reported at levels as low as 800 ng/mL.

Management of Local Anesthetic Overdose

At the first sign of change, oxygen should be administered.

The first step in the management of convulsions, as well as underventilation or apnea, consists of immediate attention to the maintenance of a patent airway and assisted or controlled ventilation with oxygen and a delivery system capable of permitting immediate positive airway pressure by mask. Immediately after the institution of these ventilatory measures, the adequacy of the circulation should be evaluated, keeping in mind that drugs used to treat convulsions sometimes depress the circulation when administered intravenously. Should convulsions persist despite adequate respiratory support, and if the status of the circulation permits, small increments of an ultra-short acting barbiturate (such as thiopental or thiamylal) or a benzodiazepine (such as diazepam) may be administered intravenously. The clinician should be familiar, prior to the use of anesthetics, with these anticonvulsant drugs. Supportive treatment of

circulatory depression may require administration of intravenous fluids and, when appropriate, a vasopressor dictated by the clinical situation (such as epinephrine to enhance myocardial contractile force).

If not treated immediately, both convulsions and cardiovascular depression can result in hypoxia, acidosis, bradycardia, arrhythmias and cardiac arrest. If cardiac arrest should occur, standard cardiopulmonary resuscitative measures should be instituted.

Endotracheal intubation, employing drugs and techniques familiar to the clinician, maybe indicated, after initial administration of oxygen by mask, if difficulty is encountered in the maintenance of a patent airway or if prolonged ventilatory support (assisted or controlled) is indicated.

DOSAGE AND ADMINISTRATION

Important Dosage and Administration Information

- EXPAREL is intended for single-dose administration only.
- Different formulations of bupivacaine are not bioequivalent even if the milligram strength is the same. Therefore, it is not possible to convert dosing from any other formulations of bupivacaine to EXPAREL.
- DO NOT dilute EXPAREL with water for injection or other hypotonic agents, as it will result in disruption of the liposomal particles.
- Use suspensions of EXPAREL diluted with preservative-free normal (0.9%) saline for injection or lactated Ringer's solution within 4 hours of preparation in a syringe.
- Do not administer EXPAREL if it is suspected that the vial has been frozen or exposed to high temperature (greater than 40°C or 104°F) for an extended period.
- Inspect EXPAREL visually for particulate matter and discoloration prior to administration, whenever solution and container permit. Do not administer EXPAREL if the product is discolored.

Recommended Dosing in Adults

Local Analgesia via Infiltration

The recommended dose of EXPAREL for local infiltration in adults is up to a maximum dose of 266mg (20 mL), and is based on the following factors:

- Size of the surgical site
- Volume required to cover the area
- Individual patient factors that may impact the safety of an amide local anesthetic

As general guidance in selecting the proper dosing, two examples of infiltration dosing are provided:

- In patients undergoing bunionectomy, a total of 106 mg (8 mL) of EXPAREL was administered with 7 mL infiltrated into the tissues surrounding the osteotomy, and 1 mL infiltrated into the subcutaneous tissue.
- In patients undergoing hemorrhoidectomy, a total of 266 mg (20 mL) of EXPAREL was diluted with 10 mL of saline, for a total of 30 mL, divided into six 5 mL aliquots, injected by visualizing the anal sphincter as a clock face and slowly infiltrating one aliquot to each of the even numbers to produce a field block.

Regional Analgesia via Interscalene Brachial Plexus Nerve Block

The recommended dose of EXPAREL for interscalene brachial plexus nerve block in adults is 133 mg (10 mL), and is based upon one study of patients undergoing either total shoulder arthroplasty or rotator cuff repair.

Compatibility Considerations

Admixing EXPAREL with drugs other than bupivacaine HCl prior to administration is not recommended.

- Non-bupivacaine based local anesthetics, including lidocaine, may cause an immediate release of bupivacaine from EXPAREL if administered together locally. The administration of EXPAREL may follow the administration of lidocaine after a delay of 20 minutes or more.
- Bupivacaine HCl administered together with EXPAREL may impact the pharmacokinetic and/or physicochemical properties of EXPAREL, and this effect is concentration dependent. Therefore, bupivacaine HCl and EXPAREL may be administered simultaneously in the same syringe, and bupivacaine HCl may be injected immediately before EXPAREL as long as the ratio of the milligram dose of bupivacaine HCl solution to EXPAREL does not exceed 1:2.

The toxic effects of these drugs are additive and their administration should be used with caution including monitoring for neurologic and cardiovascular effects related to local anesthetic systemic toxicity.

- When a topical antiseptic such as povidone iodine (e.g., Betadine®) is applied, the site should be allowed to dry before EXPAREL is administered into the surgical site. EXPAREL should not be allowed to come into contact with antiseptics such as povidone iodine in solution.

Studies conducted with EXPAREL demonstrated that the most common implantable materials (polypropylene, PTFE, silicone, stainless steel, and titanium) are not affected by the presence of EXPAREL any more than they are by saline. None of the materials studied had an adverse effect on EXPAREL.

Non-Interchangeability with Other Formulations of Bupivacaine

Different formulations of bupivacaine are not bioequivalent even if the milligram dosage is the same. Therefore, it is not possible to convert dosing from any other formulations of bupivacaine to EXPAREL and vice versa.

Liposomal encapsulation or incorporation in a lipid complex can substantially affect a drug's functional properties relative to those of the unencapsulated or nonlipid-associated drug. In addition, different liposomal or lipid-complexed products with a common active ingredient may vary from one another in the chemical composition and physical form of the lipid component. Such differences may affect functional properties of these drug products. Do not substitute.

CLINICAL PHARMACOLOGY

Pharmacokinetics

Administration of EXPAREL results in significant systemic plasma levels of bupivacaine which can persist for 96 hours after local infiltration and 120 hours after interscalene brachial plexus nerve block. In general, peripheral nerve blocks have shown systemic plasma levels of bupivacaine for extended duration when compared to local infiltration. Systemic plasma levels of bupivacaine following administration of EXPAREL are not correlated with local efficacy.

PATIENT COUNSELING

Inform patients that use of local anesthetics may cause methemoglobinemia, a serious condition that must be detected promptly. Advise patients or caregivers to seek immediate medical attention if they or someone in their care experience the following signs or symptoms: pale, gray, or blue colored skin (cyanosis); headache, rapid heart rate, shortness of breath, lightheadedness, or fatigue.

OMFS, oral and maxillofacial surgery.

Indication

EXPAREL is indicated for single-dose infiltration in adults to produce postsurgical local analgesia and as an interscalene brachial plexus nerve block to produce postsurgical regional analgesia. Safety and efficacy have not been established in other nerve blocks.

Important Safety Information

EXPAREL is contraindicated in obstetrical paracervical block anesthesia. Adverse reactions reported with an incidence greater than or equal to 10% following EXPAREL administration via infiltration were nausea, constipation, and vomiting; adverse reactions reported with an incidence greater than or equal to 10% following EXPAREL administration via interscalene brachial plexus nerve block were nausea, pyrexia, and constipation. If EXPAREL and other non-bupivacaine local anesthetics, including lidocaine, are administered at the same site, there may be an immediate release of bupivacaine from EXPAREL. Therefore, EXPAREL may be administered to the same site 20 minutes after injecting lidocaine. EXPAREL is not recommended to be used in the following patient population: patients <18 years old and/or pregnant patients. Because amide-type local anesthetics, such as bupivacaine, are metabolized by the liver, EXPAREL should be used cautiously in patients with hepatic disease.

Warnings and Precautions Specific to EXPAREL

Avoid additional use of local anesthetics within 96 hours following administration of EXPAREL. EXPAREL is not recommended for the following types or routes of administration: epidural, intrathecal, regional nerve blocks **other than interscalene brachial plexus nerve block**, or intravascular or intra-articular use. The potential sensory and/or motor loss with EXPAREL is temporary and varies in degree and duration depending on the site of injection and dosage administered and may last for up to 5 days, as seen in clinical trials.

Warnings and Precautions for Bupivacaine-Containing Products

Central Nervous System (CNS) Reactions: There have been reports of adverse neurologic reactions with the use of local anesthetics. These include persistent anesthesia and paresthesia. CNS reactions are characterized by excitation and/or depression. **Cardiovascular System Reactions:** Toxic blood concentrations depress cardiac conductivity and excitability which may lead to dysrhythmias, sometimes leading to death. **Allergic Reactions:** Allergic-type reactions (eg, anaphylaxis and angioedema) are rare and may occur as a result of hypersensitivity to the local anesthetic or to other formulation ingredients. **Chondrolysis:** There have been reports of chondrolysis (mostly in the shoulder joint) following intra-articular infusion of local anesthetics, which is an unapproved use. **Methemoglobinemia:** Cases of methemoglobinemia have been reported with local anesthetic use.
