### Michigan

Oral and maxillofacial surgery faculty. The Division of Oral and Maxillofacial Surgery at Ascension-St. John Michigan is seeking applications for a full-time faculty position available July 1, 2020, with fellowship training in cleft and craniofacial surgery. The position is available at the assistant or associate professor level. Candidates must have a Doctor of Dental Surgery (DDS), Doctor of Dental Medicine (DMD), Doctor of Medicine (MD) or equivalent and be board certified or active candidates for board certification. Responsibilities of the faculty member will include didactic and clinical instruction at the pre- and post-doctoral levels, patient care as well as scholarly activity. This position is fully system-supported to develop the service line within an expanding oral and maxillofacial program. The position offers the unique opportunity to develop a full scope academic practice while continuing to help develop the didactic curriculum. Candidate must display initiative, flexibility and a commitment to the goals and objectives of the program. Salary and benefits will be commensurate with qualification and experience. Please send a letter of intent and a curriculum vitae to Dr. Carlos A. Ramirez, email: [carlos.ramirez@ascension.org](mailto:carlos.ramirez@ascension.org).

### Minnesota

The Division of Oral and Maxillofacial Surgery at the University of Minnesota School of Dentistry is searching for a full-time faculty director for the Division. This person must be an experienced surgeon with a dedication and commitment to providing full-scope quality care and service to patients and be able to work with faculty, staff and students to provide a positive environment in which to accomplish this goal. The ideal candidate will be capable of developing a synergistic and collaborative team, creating and achieving a vision for the future of the Division of Oral and Maxillofacial Surgery (OMS) and committed to teaching and developing our predoctoral students and OMS residents. The School of Dentistry promotes diversity and inclusivity among our students, faculty, staff and public. Thus, we seek candidates whose research, teaching and/or service have prepared them to fulfill our commitment to diversity and inclusion. Salary and rank will commensurate with qualifications and experience. Applications are currently being accepted online at: [humanresources.umn.edu/content/find-job](http://humanresources.umn.edu/content/find-job). Click on external applicants, enter in search field 333208 (for Tenured option), 333209 (Tenure Track) or 333210 (Clinical Track). Contact search committee staff member Sherry Smith at [smit9517@umn.edu](mailto:smit9517@umn.edu) for questions.

### Nebraska

The University of Nebraska Medical Center in Omaha, Neb., is currently seeking an oral and maxillofacial surgeon and invites applications. As a full-time faculty member, the successful applicant will provide clinical care to patients and actively engage in teaching residents in academic and

clinical settings in a 72-month, fully accredited OMFS residency program. The faculty member will join the medical staff of Nebraska Medicine, the only nationally certified Level I trauma center in Nebraska serving both children and adults. The range of services we provide includes (but is not limited to) corrective jaw surgery, wisdom tooth removal, facial injury treatment and dental implant procedures. Highlights of this outstanding opportunity include: potential for transition into program director role; substantial incentive program; highly competitive benefits package including paid malpractice and relocation allowance. As Nebraska's only public academic health sciences center, UNMC is committed to the education of a 21st century healthcare workforce, to finding cures and treatments for devastating diseases, to providing the best care for patients, and to serve Nebraska and its communities through award-winning outreach. The successful candidate must be an MD/DO (or equivalent degree) who is board certified in oral and maxillofacial surgery. Candidates should have outstanding interpersonal skills along with enthusiasm for patient care, medical student and resident education. Applications are currently being accepted online at [unmc.peopleadmin.com/postings/42661](http://unmc.peopleadmin.com/postings/42661). Individuals from diverse backgrounds are encouraged to apply.

### New York

The Department of Oral and Maxillofacial Surgery at Montefiore Medical Center is seeking applications for a full-time faculty position. Salary and rank will commensurate with qualifications and experience. Responsibilities include clinical and didactic teaching of residents, trauma call coverage, scholarly activity and service. Candidates must be American Board of Oral and Maxillofacial Surgery-certified or active candidates for board certification. Applicants must be able to obtain a New York state dental license and be a graduate of a CODA-approved American or Canadian dental school/oral and maxillofacial surgery residency program. Montefiore is an equal opportunity/affirmative action employer. Interested candidates should send a letter of intent and curriculum vitae to Dr. Jairo Bastidas, Program Director, email: [jbastida@montefiore.org](mailto:jbastida@montefiore.org).

### Pennsylvania

Temple University Kornberg School of Dentistry is seeking applicants for a full-time faculty position in the clinical-track at an assistant or associate professor level for the Department of Oral and Maxillofacial Pathology, Medicine and Surgery. Major responsibilities of this position will include didactic and clinical teaching at the pre- and postdoctoral levels, in addition to direct patient care at the Temple University Kornberg School of Dentistry and its affiliated sites. The applicants must have a DDS/DMD from a program accredited by the Commission on Dental Accreditation (CODA) of the American Dental Association and must have successfully completed advanced training in oral

## Faculty Positions

*continued from previous page*

and maxillofacial surgery at a CODA-accredited institution. Applicants must be eligible for full licensure in the Commonwealth of Pennsylvania, certified by the American Board of Oral and Maxillofacial Surgery or be a candidate for board certification. Expertise in predoctoral education and full-scope of oral and maxillofacial surgery with emphasis on office anesthesia, sleep apnea and orthognathic surgery are highly desirable. Pursuit of scholarly activities is strongly encouraged. Salary and rank will be commensurate with experience and qualifications. Temple University is an equal opportunity/affirmative action employer. Women and minorities are encouraged to apply. For confidential consideration, interested individuals should email a cover letter, curriculum vitae and three references to: Mehran Hossaini, DMD, mhossaini@temple.edu, Professor and Chair, Department of Oral and Maxillofacial Pathology, Medicine, Surgery, Temple University, Kornberg School of Dentistry, 3223 North Broad Street, Philadelphia, PA 19140.

## Pennsylvania

The University of Pittsburgh School of Dental Medicine (UPSDM) is accepting applications for a full-time faculty member in the Department of Oral and Maxillofacial Surgery (OMS). The faculty position is in the non-tenured stream, and the faculty member's rank may be assistant professor, associate professor or professor, depending on experience and qualifications. The primary responsibilities will include didactic and clinical instruction of students and residents, scholarly activities and service. Participation in the faculty practice is also expected. We are seeking an outstanding individual with excellent leadership skills to contribute to all aspects of our clinical practice, our educational programs and the research impact of our institution. The candidate must have a DDS or DMD degree and be eligible for board certification or be board-certified by the American Board of Oral and Maxillofacial Surgery. The candidate must possess or be able to obtain an appropriate license for clinical practice in the Commonwealth of Pennsylvania, have a developed or have a developing area of clinical excellence and have mentoring experience. Favorable consideration will be given to those with additional training credentials such as an MD, PhD, fellowship qualification or other advanced degrees. Salary will be commensurate with the candidate's qualifications, experience and credentials. Desirable candidates will have substantial experience in the research environment, unique clinical talents and strong mentoring skills. Application reviews will continue until the position is filled. The University of Pittsburgh is a top-tier public research institution and is currently ranked 5th among United States universities in NIH funding. The UPSDM is also ranked 6th in NIDCR funding among U.S. dental schools. The UPSDM is located on the university's main campus in Pittsburgh, contiguous with the other five health science schools. The Department of OMS works as a key partner within the School of

Dental Medicine and the University of Pittsburgh Medical Center (UPMC). UPMC is an internationally renowned academic medical center and healthcare enterprise. The robust infrastructure supports clinicians and educators with innovative clinical programs, biomedical research and health sciences research, enabling discoveries that save lives and change the landscape of patient care. As part of the faculty of the University of Pittsburgh and as an attending at UPMC, the surgeon will have the opportunity to collaborate with clinicians, innovators and investigators from around the world, becoming part of a vibrant community of healthcare providers dedicated to making a difference in their chosen field – and in the lives of others. The Department of OMS is fortunate to be situated in this dynamic and innovative environment, where researchers and providers collaborate with the desire to affect the development of transformative scientific discovery, leading to significant clinical improvements for our patients. We invite all interested candidates to send their curriculum vitae and letter of interest to: Dr. Larry L. Cunningham Jr., Professor and Chair, Department of Oral and Maxillofacial Surgery; University of Pittsburgh School of Dental Medicine; 3501 Terrace Street, Room 427 Salk Hall, Pittsburgh, PA 15261; Tel: (412)648-6201 email: lac229@pitt.edu. The University of Pittsburgh is an Affirmative Action, Equal Opportunity Employer and values equality of opportunity, human dignity and diversity. EEO/AA/M/F/Vets/Disabled.

## Tennessee

The University of Tennessee Graduate School of Medicine in Knoxville is seeking applications for a full-time faculty position in the Department of Oral and Maxillofacial Surgery. Responsibilities include didactic education and clinical teaching of residents, patient care and research. Academic rank will be commensurate with qualifications and experience. A competitive reimbursement and benefits package exists for this position. The candidate should have an interest in major oral and maxillofacial surgery with a particular focus in trauma management with the intention of directing clinical and research activities in oral and maxillofacial trauma management within the department/academic medical center. The University of Tennessee Medical Center is a tertiary care academic medical center with a Level I trauma center. Candidates must be eligible to acquire a license to practice dentistry and/or medicine in the state of Tennessee. Individuals interested in this career opportunity should submit curriculum vitae and three letters of recommendation to: [ut.taleo.net/careersection/uthsc\\_faculty/jobsearch.ftl](http://ut.taleo.net/careersection/uthsc_faculty/jobsearch.ftl). The University of Tennessee Medical Center is an equal opportunity/affirmative action employer and encourages women and minorities to apply.

## Texas

The Department of Oral and Maxillofacial Surgery at the School of Dentistry at the University of Texas Health Science Center in San Antonio, Texas, is pleased to invite applicants for a full-time faculty

position in the department. The duties of the faculty member will include participation in patient care, teaching and research. Candidates with interest and fellowship training in dental implant and fluency in Spanish are preferred. Applicants with scholarly and research interests are encouraged. Applicants for the position should have a dental degree recognized by the Commission on Dental Accreditation of the American Dental Association or equivalent foreign BDS or DDS training and must have successfully completed advanced training in oral and maxillofacial surgery at an institution accredited by the Commission on Dental Accreditation. Applicants must be eligible for dental licensing in the state of Texas. All faculty participate in and receive salary augmentation through the dental school's faculty practice plan. Applicants should apply on the UTHSCSA employment page located at [uthscsa.referrals.selectminds.com/faculty](http://uthscsa.referrals.selectminds.com/faculty). Please create a profile and submit your application. Applicants for the position are welcome to call 210-450-3112 or 3131 if they have further questions. Formal applications should include a narrative statement of interests, curriculum vitae and three letters of reference. The University of Texas Health Science Center at San Antonio is an Equal Employment Opportunity/Affirmative Action Employer including protected veterans and individuals with disabilities. All faculty appointments are designated as security sensitive positions.

## Washington

The Department of Oral and Maxillofacial Surgery (OMS) at the University of Washington is searching for a full-time faculty member at the rank of clinical assistant or associate professor, salaried (non-tenure). Minimum requirements include a DMD/DDS degree from an ADA-accredited institution or equivalent and completion of a residency program in oral and maxillofacial surgery. MD or secondary degree in a related field is preferred. Candidates must be ABOMS-eligible or qualified and eligible for dental licensure in the state of Washington. Salary and academic rank will be commensurate with qualifications and experience. The Department seeks candidates who can engage productively in clinical activities as part of the faculty practice and contribute to the Department's research mission. The ideal candidate will practice the full scope of oral and maxillofacial surgery with a proven track record of building a clinical practice and a niche clinical interest, e.g. trauma, microvascular reconstruction, orthognathic, TMJ. The candidate will demonstrate a personal commitment to the goals and ideals of academic service including a desire to work in a teaching environment, collaborate in a dialectic culture and observe evidence-based clinical practices. Interested, qualified applicants should submit a personal statement along with a CV, the names and addresses of three references to Ms. Bridget Doyle ([badw@uw.edu](mailto:badw@uw.edu)). Position is open until filled. For questions, please contact: Thomas B. Dodson, DMD, MPH, FACS, Professor and Chair, Department of Oral and Maxillofacial Surgery, email address: [tbdodson@uw.edu](mailto:tbdodson@uw.edu).

## Fellowships CODA

### Michigan

The University of Michigan is offering a one-year fellowship for recent OMS graduates. The fellowship is sponsored by the section of Oral and Maxillofacial Surgery and will provide extensive experience in major operative room cases including orthognathic, TMJ, trauma and pediatric surgery. The fellowship aims to enhance skills in diagnosis and treatment for dentofacial disorders, obstructive sleep apnea, salivary gland disorders, minimally invasive TMJ surgery, autogenous and alloplastic TMJ total joint replacement, maxillofacial pathology, as well as cleft and craniofacial disorders. The fellow will gain extensive experience in the use and application of new technologies such as virtual planning, custom implants and surgical navigation. In addition, the fellow will participate in collaborative team-based care in the management of obstructive sleep apnea, juvenile idiopathic arthritis affecting the TMJ, and orofacial cleft conditions. The fellow will have the opportunity to participate in clinical research and publication of papers. Applicants must be eligible for a Michigan state dental license. Please submit a letter of interest and curriculum vitae to Sharon Aronovich [saronovi@med.umich.edu] or Sean P. Edwards [seanedwa@med.umich.edu].

## Fellowships Non-CODA Accredited

### California

### North Carolina

The Craniomaxillofacial Trauma and Reconstructive Surgery Fellowship at Duke University offers a one- to two-year clinical and research experience in complex craniomaxillofacial reconstructive surgery for fully trained craniomaxillofacial surgeons who desire to be academic leaders in craniomaxillofacial traumatology. The training program is based in the Duke University Department of Surgery's Division of Plastic, Maxillofacial, and Oral Surgery. The fellowship offers a broad-based experience in craniomaxillofacial surgical traumatology and facial reconstructive surgery at the world-renowned Duke University Medical Center. The focus of the fellowship will be on the utilization of advanced surgical techniques for comprehensive craniomaxillofacial reconstruction, including intraoperative computer navigation, patient specific implant fabrication and complex facial reconstructive surgery after traumatic injury or pathologic resection. For more information, contact [colleen.mcdowell@duke.edu](mailto:colleen.mcdowell@duke.edu).

## Fellowships Non-CODA Accredited *continued from previous page*

### North Carolina

The fellowship will provide extensive exposure and advanced clinical training for oral and maxillofacial surgeons in orthognathic surgery, temporomandibular joint surgery and complex implant reconstruction. The clinicians completing the fellowship throughout its 12-year history have subsequently applied their experience to both academic and private practice settings. A substantial stipend is offered. The OMS selected for this position must be able to obtain either an unrestricted North Carolina dental license or North Carolina medical license, obtain hospital privileges and be available from July 1, 2021, through June 30, 2022. The candidate will have extensive exposure to consultations, diagnosis, interdisciplinary treatment planning, treatment and postoperative management of a wide array of patients. It is expected that the candidate will be involved with several hundred major surgical cases. Carolinas Center for Oral and Facial Surgery (CCOFS) is located in Charlotte, N.C. CCOFS is a 14-surgeon practice with six offices in N.C. and four in S.C., with most possessing OR facilities and accredited by the AAAHC. The surgeons are well-known locally and nationally in the OMS specialty. To apply, an application must be completed and returned by Aug. 31 of each year. The selection will be made on Dec. 31 of each year in order to allow time for licensure. Interested candidates can email dketola@mycenters.com for an application. For more information on the practice, log on to www.mycenters.com.

### Oregon

The Head and Neck Institute (HNI) is offering as 12-month fellowship in Advanced Craniomaxillofacial and Trauma Surgery (ACMF-Trauma). This fellowship is based at Legacy Emanuel Medical Center (LEMC) in Portland, Ore. The fellowship covers advanced training in head and neck surgery, maxillofacial trauma and airway management. It also includes experience in sleep surgery (nerve stimulator placement) and craniofacial surgery. The faculty includes Eric Dierks, DMD, MD, FACS; Bryan Bell, DDS, MD, FACS; Allen Cheng, DDS, MD, FACS; Ashish Patel, DDS, MD, FACS; and Caitlin McGraw, DDS, MD. Please contact us directly for more detailed information about the program. Information about our practice and fellowship program can also be found at www.head-neck.com. Please email us at chenga@hnsa1.com.

### Texas

Postgraduate fellowship in orthognathic and TMJ surgery offered to recent graduate from accredited OMS program. Expand your skills while working with an accomplished surgeon. Exposure to all aspects of OMS practice is included. All

applicants must be eligible to receive a Texas dental license. Contact Dr. Sinn at 817-225-3223 or email dpsinnoms@gmail.com.

### West Virginia

Charleston Area Medical Center and the Department of Surgery are pleased to offer a one-year post-residency fellowship in Pediatric Cleft & Craniomaxillofacial Surgery available July 1, 2021, to June 30, 2022. The position involves all aspects of surgical and multi-disciplinary management of children with congenital and acquired deformities. Primary participation in management, craniomaxillofacial trauma and reconstruction, orthognathic surgery, pathology, and pediatric otolaryngology surgery is also provided. Approximately half of the time is spent caring for pediatric patients. The fellowship is funded at the PGY sixth or seventh year and has an attractive benefits package including assistance with housing. Send inquiries to: Paul Klooststra, DDS, MD, Director, CAMC Cleft and Craniofacial Center, 830 Pennsylvania Ave., Suite 302, Charleston, WV 25302; email paul.klooststra@camc.org and natalie.sims@camc.org; fax 304-388-2951.

## Georgia

Georgia Oral & Facial Reconstructive Surgery is looking for a highly qualified OMS to join this practice. Our focus is on a comprehensive surgical practice including all facets of OMS, as this is the only OMFS practice in Georgia with a JCAHO-accredited facility. Please send resume & CV to [kristen@georgiaofs.com](mailto:kristen@georgiaofs.com).

## Illinois

Fifty-year-old established practice, located in an affluent suburb, 60 miles northwest of Chicago, is looking to hire a full-time associate that can transition to partnership when senior doctor retires. Our practice is state-of-the-art, set in a casual loft design. It's supported by a community with strong growth in housing and retail. Public transportation via the Metra, which runs between the suburbs and Chicago, is one mile from our office. We are looking for an associate who exhibits leadership, great work ethic, compassion and professionalism in taking care of our patients as well as our support team. Our practice is a full-scope oral surgery office with emphasis on dentoalveolar, pathology and implant surgery. The doctors are on staff at a hospital that is five miles from our office. Benefits will include medical and malpractice insurance, hospital dues, society memberships, retirement contributions, board examination fees and vacation. Reply to [jtrthomp@aol.com](mailto:jtrthomp@aol.com).

## Illinois

Excellent oral surgery opportunity in the Chicagoland area! Our highly successful private oral surgery practice has a great opportunity for an oral surgeon to join the team. Primarily fee-for-service, some PPO. State-of-the-art facility. Highly respected, busy practice with great relations in the dental community. Long-term security. Wide range of procedure scope. Excellent earnings to include great benefits package. Please email CV to [omaxdoc@gmail.com](mailto:omaxdoc@gmail.com).

## Illinois

Full-scope OMS practice in the northern suburbs of Chicago seeking a board-certified/eligible OMS. Full-time and part-time associate positions available. Partnership opportunity available for a motivated individual. Flexible schedule and excellent salary and benefits. Reply to AAOMS Classified Box A-061019.

## Illinois

Rare opportunity available for OMS board-certified or active candidates to join a thriving and rapidly growing oral and maxillofacial surgery center. Our main focus is orthognathic surgery and dentoalveolar implant surgery but open to expand in any direction. Our beautifully designed and decorated office is three years new, equipped with CBCT and other state-of-the-art technology. Join our dedicated team and work with the former program director of a reputable OS residency program. This solo practice is highly visible to traffic but also has loyal referrals by dentists and orthodontists. Only a half-hour drive from downtown Chicago and minutes away from 390, I-90 and Metra station. Our employment package has a very competitive salary and attractive bonus structure. Please email resume to [sandy@oramax.net](mailto:sandy@oramax.net) re: OMS applicant.

## Kentucky

Looking for an energetic board-certified/eligible oral and maxillofacial surgeon to join our growing, multi-location, five-surgeon OMFS practice in Lexington, Ky. We offer an excellent compensation and benefit package to include a guaranteed base salary, bonus plan, 401(k), life insurance, paid vacation, medical/dental/vision plans, and malpractice insurance. Relocation assistance for the right candidate is possible. Please send your CV and cover letter to [reda@kentuckyoms.com](mailto:reda@kentuckyoms.com) or contact Reda Vaughn at 859-278-9376, ext. 1108.

## Maryland

Immediate and summer positions (2020) are available for Associates leading to fast-track partnership in a state-of-the-art, highly successful, expanding, multi-location, full-scope oral and maxillofacial surgery practice in Maryland/D.C./

## Available Positions

*continued from previous page*

Virginia metro area. Our team is looking for a bright, ambitious and caring individual. Our future partner must be proficient in all phases of OMS including outpatient general anesthesia, dentoalveolar, implant, TMJ, orthognathic and cosmetic procedures. Board-certified or an active candidate for board certification a must. We offer a highly competitive base salary, production incentives, generous signing incentives and student loan repayment program as well as a benefit package (including malpractice and family health insurance). If you are interested, please forward your CV to Ms. Petersen at mdmosa20850@gmail.com.

## Maryland

Mid-Maryland Oral and Maxillofacial Surgery, PA, located in beautiful Frederick, Md., is searching for a new associate (board-certified or board-eligible) to join its team of three surgeons. Mid-Maryland Oral and Maxillofacial Surgery is a very busy, well-respected, full-scope office founded over 20 years ago, serving Maryland, Pennsylvania, Delaware, Virginia and West Virginia communities. Our surgeons also have full privileges at Frederick Memorial Hospital. Frederick, voted as one of the best places to live, is located within 45 miles of Baltimore and Washington DC. We have access to big city amenities without losing our small-town charm. The successful candidate will have the opportunity to obtain full partnership with an excellent salary/benefit package. Please email CV to Lhogan@midmaryland.com or fax: 301-694-7372.

## Maryland

Offering an opportunity for an oral & maxillofacial surgeon to join a well-established, multi-office practice in Baltimore City and County. Leading to a full partnership. Email resume to dentalapplicant1900@gmail.com.

## Maryland

Well-respected, long-established, fully equipped, two-office practice in growing Metro D.C./Baltimore area. Motivated board-certified/eligible individual for associateship or practice buy-in/out. Must be proficient in all phases of OMS. Competitive salary with production incentives plus benefits. Reply OMSadrecruit@gmail.com.

## Maryland/Washington, D.C., Metro Area

Busy, comprehensive OMFS practice looking for an immediate and summer 2020 full-/part-time surgeon in the DC/MD area. Must be board-eligible/-certified. Compensation will be on a commission basis. Additional benefits are included. Send CV to velvel18@aol.com.

## Massachusetts

Career opportunity for OMS board-certified or active candidate for certification. Associate position, fast-tracked to partnership, in well-established, full-scope, two-location OMS group. Desire outgoing, friendly personality. Excellent compensation. Close to Boston and its renowned cultural, educational and recreational offerings. Email CV to hresbah@gmail.com.

## Massachusetts

Well-established, highly respected group practice serving southeastern Massachusetts for over 50 years is seeking a full- or part-time associate position. This three-surgeon practice has a strong referral base with an emphasis on dentoalveolar and implant surgery. A fast track to partnership possible with our senior partner recently retiring. Very competitive financial package and benefits offered, including strong base salary. Reply to AAOMS Classified Box A-010419.

## Michigan

Plymouth Oral & Facial Surgery, PLC, a long-standing, successful and well-respected, busy OMS group practice with three locations, is seeking a full-time, board-eligible/board-certified oral surgeon. We have offices in the Plymouth, Ann Arbor and Chelsea, Mich., areas, and our communities have excellent public and private school opportunities. All of our offices are within a short commute to a number of cities that provide outstanding cultural and sporting events. Our offices are equipped with state-of-the-art equipment, including CBCT machines, intra-oral scanners and a CO2 laser. We have a dedicated staff, including a full-time marketing coordinator. Our surgical assistants are highly skilled in assisting and DAANCE-certified. Our practice promotes continuing education of our doctors and employees. We are entering our fifth year as hosts to a Seattle Study club-based study club. We have a very strong referral base supported by excellent referral relationships throughout the area. It is important that our candidate is friendly, honorable and respectful of our practice and our dental community. Our new surgeon will promote a team attitude and place patient care first. We are offering a full-time position (4.5 days) with a competitive compensation package, including health insurance, 401(k) and a CE stipend. Interested applicants should email your CV with contact information to Jeff Wasielewski at jeffwasdds@gmail.com.

## Missouri (St. Louis)

Outstanding opportunity for an Oral and Maxillofacial Surgeon to join a full-scope, hospital-based, group, private practice that also sponsors a nationally recognized, multi-focused Fellowship Training Program. The Oral Facial Surgery Institute is a professionally managed practice with an excellent reputation and a vast network of regional

referrals rendering complex care to a large region of the Midwest. Our facilities include seven private practice offices in outstanding, closely surrounding communities. All of our surgeons work directly with our fellows in an academic/private practice environment. We pride ourselves in providing superb, comprehensive care to our patients. St. Louis is a delightful city with a small-town feel and an excellent community to raise a family. No buy-in necessary for the right person. For confidential consideration, interested individuals should send a letter of intent and CV to Oral Facial Surgery Institute Attn: Michael W. Noble, DMD, Chairman of the Division of Oral and Maxillofacial Surgery and/or Scott Graham, MHA, FAADOM, FACMPE, Chief Executive Officer, 621 South New Ballas Rd., Suite 16A, St. Louis, MO 63141; phone 314-251-6725; fax 314-251-6726; email mwnoble@aol.com or scott@ofsinstitute.com; www.ofsinstitute.com.

## Nevada

OMFS needed for busy, full-scope oral and maxillofacial surgery group practice in Las Vegas, Nev. We have two full-time offices (one in Henderson, one in NW Las Vegas). Would you enjoy working in a team environment where camaraderie is high, ethics and quality of care are paramount and the sun is always shining? Ideal candidate will have excellent communication skills, a great work ethic and a willingness to deliver stellar patient service. Great opportunity to accelerate your career path. We've been told we provide the most dental implants and all-on-4 cases west of the Mississippi. Trauma and ortho cases are seen here as well. Excellent salary/benefits package. Immediate buy-in available for Las Vegas and/or Reno area (we are looking for someone who seeks partnership status). See our website at nofslv.com for more information about our practice and surgeons. Call Lorraine at 702-360-8918 or email lorraine@nofslv.com for more information.

## New Jersey

Upscale, well-established private practices offering full-time and part-time opportunity to BE/BC OMFS leading to partnership. 20 minutes from Manhattan. N.Y.C./N.J. hospital affiliations available. Excellent compensation, comprehensive benefits. Long-term experienced staff to assist with transition. Email resumes to info@njcosa.com.

## New Jersey

We are in need of a full-time oral and maxillofacial surgeon to join our practice located in central New Jersey. We are a well-established group with three offices and three surgeons. Our practice was founded in 1970, and as a result of referral growth, we are looking to add an additional surgeon. This is an excellent opportunity for someone to join our practice. Our ideal candidate should be a dynamic team player with fantastic interpersonal skills. They should be well-versed in all aspects of our specialty with emphasis on dentoalveolar surgery, implant surgery and in-office anesthesia. We are offering a

very competitive compensation package including health insurance and excellent retirement benefits. Ideally, this position will begin with an employment agreement leading to partnership. Interested applicants please reply to [dawnsosg@optimum.net](mailto:dawnsosg@optimum.net).

## New Jersey

A fabulous opportunity is available due to the forthcoming retirement of a senior partner. A full-time position fast tracking to a well-defined equal partnership is planned to provide a career with long-term stability. We have a well-established, ever-evolving practice that is 32 years old. It consists of three progressive doctors of excellent reputation who encourage a collegial relationship. We are committed to quality patient care founded upon a very large, dependable referral base. Practice emphasis is on dentoalveolar surgery, third molars, implants and office anesthesia. There is unlimited potential to expand the scope of our practice if desired. Our three offices are state-of-the-art and well-equipped with digital imaging, CBCT and intraoral scanning. Please email resumes to [tkolb@coastaloralsurgerynj.com](mailto:tkolb@coastaloralsurgerynj.com).

## New Jersey

A well-established and respected OMS practice in northern New Jersey has an exciting opportunity for a full-time oral surgeon. We are seeking a well-trained, highly motivated candidate with excellent surgical and interpersonal skills for a full-time associate position. Board-certified or active candidate for board certification preferred. Opportunity for full-scope practice in our state-of-the-art modern, and well-equipped facility. Competitive compensation package with great benefits. Please email [ecaiola422@gmail.com](mailto:ecaiola422@gmail.com).

## New Jersey

A well-established and respected OMS practice with two locations in central New Jersey (close to New York City and Philadelphia – with their illustrious educational, cultural, and recreational offerings), seeking a well-trained, highly-motivated candidate with excellent surgical and interpersonal skills for full-time and part-time associate positions with partnership track. Board-certified or active candidate for board certification preferred. There is an opportunity for full-scope practice at both locations. Both office locations are state-of-the-art, modern and well-equipped facilities. We offer a competitive compensation package with great benefits. Please email CV to [dr.edkozlovsky@gmail.com](mailto:dr.edkozlovsky@gmail.com).

## New Jersey

Associate position available for three practice locations in southern New Jersey. Board-certified or board-eligible preferred. Part or full time available. Interest in partnership transitioning into ownership preferred. Practice locations: Linwood, N.J.; Cape

May Courthouse, N.J.; and Maple Shade, N.J. Call 609-350-5233 or email [benaifer3@hotmail.com](mailto:benaifer3@hotmail.com).

## New Jersey

If you are motivated and understand what it takes to cultivate the optimal patient experience each and every time, please contact us. We are a well-established and still rapidly expanding full-scope, multi-office practice minutes from NYC with a focus on office-based oral surgery and affiliations at some of the region's most prestigious hospitals. We are the official oral surgeons of the New Jersey Devils, and we are seeking a full-time BC/BE partnership-minded associate to join our team with huge potential for more. [info@riversideoralsurgery.com](mailto:info@riversideoralsurgery.com)

## New Jersey

Looking for an enthusiastic oral surgeon to join a highly reputable private practice with multiple locations throughout the beautiful suburban areas of Northern New Jersey and near the Jersey Shore. Randolph Center for Oral & Maxillofacial Surgery is a comprehensive provider for oral and maxillofacial surgery with affiliations at Morristown Medical Center and New York Presbyterian Weill-Cornell Medical Center. This well-established, growing practice now has a great opportunity for a new and upcoming oral surgeon looking to gain experience at a state-of-the-art, full-scope practice. Randolph Oral Surgery is offering a full-time position to a board-eligible surgeon – an excellent salary and benefits package is included in this exciting opportunity! If interested in this position, please fax resumes to 973-328-3405. We are looking forward to hearing from you soon!

## New York

Outstanding opportunity to join a growth-oriented, innovative multi-location OMS practice in Manhattan and the Tri-State region. We have commitments for many new locations in Connecticut, New Jersey and New York. The metropolitan New York City area is an excellent place to live/work with a vast array of educational, cultural and recreational activities. The ideal candidate must possess top skills and display excellent interpersonal skills. The practice is office-based, full-scope dental alveolar and implant surgery under IV sedation and general anesthesia. The facilities and equipment are high quality and digital. Emergency room call and academic affiliations are available. The practice is the employer of choice with the top compensation and equity participation for ideal candidates. Will support and assist in obtaining state licenses and U.S. work permits (including sponsoring green card or U.S. citizenship). Email CV to [robert.bodey@mofsnyc.com](mailto:robert.bodey@mofsnyc.com) or contact Robert Bodey at 347-590-9910.

## New York (Long Island)

Seeking energetic person to join a unique, multi-doctor practice. Association leading to partnership for motivated, personable and ethical OMS. Our group is office-/hospital-based and provides a full scope of oral and maxillofacial surgery, including cosmetic procedures. A full-time esthetician also provides nonsurgical cosmetic services in our medical spa. We offer an excellent salary plus a comprehensive benefit package that includes malpractice, health, life insurance, 401(k) and profit sharing. Reply to AAOMS Classified Box A-4442.

## New York (Long Island)

Long-standing, established Nassau County practice seeking a motivated, ethical, hard-working and highly skilled full-time OMS. Reply to AAOMS Classified Box A-4416.

PRF centrifuge systems, piezosurgery and general anesthesia capabilities. The office is located one block from a regional medical center. The practice is located in the greater Fayetteville region of North Carolina and is located 1 hour from Raleigh and 1 1/2 hours to the North Carolina coast and serves over 10+ surrounding counties. Please email resume to bspell@sandhillsoms.com.

## North Dakota

Well-established solo practice in Fargo, N.D., is seeking a board-eligible/-certified single- or dual-degree oral and maxillofacial surgeon to join our practice. It is an economically growing region in the upper Midwest. The practice, at present, is full-scope. I have a very large implant practice and there is growth available in all aspects of the specialty. The practice draws from approximately a one hundred mile radius and from about 80-100 possible referral sources. Salary will be negotiable and competitive as well as a two-year associate contract leading to buy-in. Resumes can be mailed to the office (Attention: Amy) or email to amy@prairieoralsurgery.com. Feel free to visit our website at prairieoralsurgery.com.

## North Dakota

Excellent opportunity for a board-certified oral surgeon or an active candidate for board certification to join our very successful multi-doctor, multi-location practice in Grand Forks. With almost 30 years in practice, we have an exceptionally large referral base covering the state of North Dakota as well as western Minnesota and northern South Dakota within our four state-of-the-art facilities. Excellent financial package and benefits leading to early partnership. Please send letter of interest and CV to bpeterson@faceandjawsurgery.com or Face and Jaw Surgery Center, ATTN: Betsey Peterson, 2845 36th Ave South, Grand Forks, ND 58201.

## Ohio

Well-established OMS practice located on the shores of Lake Erie is looking for an associate looking to become a partner. Busy, up-to-date, two-office practice located in a beautiful vacation area with an enormous opportunity. Reply to AAOMS Box A-110318.

## Ontario, Canada

Very busy practice with four locations in Ottawa looking to hire a full-time associate with opportunity to become a partner. Please submit your resume via email to whinz@argyleassociates.com.

## Pennsylvania

Well-established, highly respected, thriving, two-office OMS practice in southern Chester County seeking an energetic, personable, highly motivated, team-oriented oral surgeon. Our practice mission is to provide exceptional patient care in a comfortable and safe manner with a well-trained staff and the most modern amenities. We are offering an associate position, which will transition into a partnership opportunity, with a competitive salary, malpractice, and health insurance, pension, continuing education compensation included. Our two state-of-the-art offices provide an excellent setting to provide full-scope OMS. Our offices are centrally located between New York, Philadelphia, and Washington, D.C. Chester County is an excellent place to establish a residence with school districts that are consistently ranked among the best in the nation. Reply to AAOMS Classified Box A-5001.

## Quebec, Canada

A group practice of oral and maxillofacial surgeons with an established referral base and an experienced team seeks an oral and maxillofacial surgeon certified with the Royal College of Dentists in Canada. We have a full-scope practice in oral and maxillofacial surgery specialized in oral surgery, implants, orthognathic surgery, TMJ, sleep apnea and trauma (in a regional trauma center). Fluency in French is required. Please reply with curriculum vitae to: Clinique Maxillo-Mauricie; Office: 819-378-4353; Fax: 819-378-7661; Email: info@maxillomauricie.com.

## South Carolina

Experienced OMFS looking to transition a new OMFS to Georgetown, S.C. Excellent doctor and patient referral base. Busy practice. Great opportunity for the right OMFS. # EXPAREL®

(bupivacaine liposome injectable suspension)

**Brief Summary**  
(For full prescribing information refer to package insert)

**INDICATIONS AND USAGE**

EXPAREL is indicated for single-dose infiltration in adults to produce postsurgical local analgesia and as an interscalene brachial plexus nerve block to produce postsurgical regional analgesia.

Limitation of Use: Safety and efficacy has not been established in other nerve blocks.

**CONTRAINDICATIONS**

EXPAREL is contraindicated in obstetrical paracervical block anesthesia. While EXPAREL has not been tested with this technique, the use of bupivacaine HCl with this technique has resulted in fetal bradycardia and death.

**WARNINGS AND PRECAUTIONS**

**Warnings and Precautions Specific for EXPAREL**

As there is a potential risk of severe life-threatening adverse effects associated with the administration of bupivacaine, EXPAREL should be administered in a setting where trained personnel and equipment are available to promptly treat patients who show evidence of neurological or cardiac toxicity.

Caution should be taken to avoid accidental intravascular injection of EXPAREL. Convulsions and cardiac arrest have occurred following accidental intravascular injection of bupivacaine and other amide-containing products.

Avoid additional use of local anesthetics within 96 hours following administration of EXPAREL.

EXPAREL has not been evaluated for the following uses and, therefore, is not recommended for these types of analgesia or routes of administration.

- epidural
- intrathecal
- regional nerve blocks other than interscalene brachial plexus nerve block
- intravascular or intra-articular use

EXPAREL has not been evaluated for use in the following patient population and, therefore, it is not recommended for administration to these groups.

- patients younger than 18 years old
- pregnant patients

The potential sensory and/or motor loss with EXPAREL is temporary and varies in degree and duration depending on the site of injection and dosage administered and may last for up to 5 days as seen in clinical trials.

**ADVERSE REACTIONS**

**Clinical Trial Experience**

**Adverse Reactions Reported in Local Infiltration Clinical Studies**

The safety of EXPAREL was evaluated in 10 randomized, double-blind, local administration into the surgical site clinical studies involving 823 patients undergoing various surgical procedures. Patients were administered a dose ranging from 66 to 532 mg of EXPAREL. In these studies, the most common adverse reactions (incidence greater than or equal to 10%) following EXPAREL administration were nausea, constipation, and vomiting. The common adverse reactions (incidence greater than or equal to 2% to less than 10%) following EXPAREL administration were pyrexia, dizziness, edema peripheral, anemia, hypotension, pruritus, tachycardia, headache, insomnia, anemia postoperative, muscle spasms, hemorrhagic anemia, back pain, somnolence, and procedural pain.

**Adverse Reactions Reported in Nerve Block Clinical Studies**

The safety of EXPAREL was evaluated in four randomized, double-blind, placebo-controlled nerve block clinical studies involving 469 patients undergoing various surgical procedures. Patients were administered a dose of either 133 or 266 mg of EXPAREL. In these studies, the most common adverse reactions (incidence greater than or equal to 10%) following EXPAREL administration were nausea, pyrexia, and constipation.

The common adverse reactions (incidence greater than or equal to 2% to less than 10%) following EXPAREL administration as a nerve block were muscle twitching, dyspnea, urinary retention, fatigue, headache, confusional state, hypotension, hypertension, hypoesthesia oral, pruritus generalized, hyperhidrosis, tachycardia, sinus tachycardia, anxiety, fall, body temperature increased, edema peripheral, sensory loss, hepatic enzyme increased, hiccups, hypoxia, post-procedural hematoma.

**Postmarketing Experience**

These adverse reactions are consistent with those observed in clinical studies and most commonly involve the following system organ classes (SOCs): Injury, Poisoning, and Procedural Complications (e.g., drug-drug interaction, procedural pain), Nervous System Disorders (e.g., palsy, seizure), General Disorders And Administration Site Conditions (e.g., lack of efficacy, pain), Skin and Subcutaneous Tissue Disorders (e.g., erythema, rash), and Cardiac Disorders (e.g., bradycardia, cardiac arrest).

**DRUG INTERACTIONS**

The toxic effects of local anesthetics are additive and their co-administration should be used with caution including monitoring for neurologic and cardiovascular effects related to local anesthetic systemic toxicity. Avoid additional use of local anesthetics within 96 hours following administration of EXPAREL.

Patients who are administered local anesthetics may be at increased risk of developing methemoglobinemia when concurrently exposed to the following drugs, which could include other local anesthetics:

**Examples of Drugs Associated with Methemoglobinemia:**

Class	Examples
Nitrates/Nitrites	nitric oxide, nitroglycerin, nitroprusside, nitrous oxide
Local anesthetics	articaine, benzocaine, bupivacaine, lidocaine, mepivacaine, prilocaine, procaine, ropivacaine, tetracaine
Antineoplastic agents	cyclophosphamide, flutamide, hydroxyurea, ifosfamide, rasburicase
Antibiotics	dapsone, nitrofurantoin, para-aminosalicylic acid, sulfonamides
Antimalarials	chloroquine, primaquine
Anticonvulsants	Phenobarbital, phenytoin, sodium valproate
Other drugs	acetaminophen, metoclopramide, quinine, sulfasalazine

**Bupivacaine**

Bupivacaine HCl administered together with EXPAREL may impact the pharmacokinetic and/or physicochemical properties of EXPAREL, and this effect is concentration dependent. Therefore, bupivacaine HCl and EXPAREL may be administered simultaneously in the same syringe, and bupivacaine HCl may be injected immediately before EXPAREL as long as the ratio of the milligram dose of bupivacaine HCl solution to EXPAREL does not exceed 1:2.

**Non-bupivacaine Local Anesthetics**

EXPAREL should not be admixed with local anesthetics other than bupivacaine. Nonbupivacaine based local anesthetics, including lidocaine, may cause an immediate release of bupivacaine from EXPAREL if administered together locally. The administration of EXPAREL may follow the administration of lidocaine after a delay of 20 minutes or more. There are no data to support administration of other local anesthetics prior to administration of EXPAREL.

Other than bupivacaine as noted above, EXPAREL should not be admixed with other drugs prior to administration.

**Water and Hypotonic Agents**

Do not dilute EXPAREL with water or other hypotonic agents, as it will result in disruption of the liposomal particles

**USE IN SPECIFIC POPULATIONS**

**Pregnancy**

**Risk Summary**

There are no studies conducted with EXPAREL in pregnant women. In animal reproduction studies, embryo-fetal deaths were observed with subcutaneous administration of bupivacaine to rabbits during organogenesis at a dose equivalent to 1.6 times the maximum recommended human dose (MRHD) of 266 mg. Subcutaneous administration of bupivacaine to rats from implantation through weaning produced decreased pup survival at a dose equivalent to 1.5 times the MRHD [see Data]. Based on animal data, advise pregnant women of the potential risks to a fetus.

The background risk of major birth defects and miscarriage for the indicated population is unknown. However, the background risk in the U.S. general population of major birth defects is 2-4% and of miscarriage is 15-20% of clinically recognized pregnancies.

**Clinical Considerations**

**Labor or Delivery**

Bupivacaine is contraindicated for obstetrical paracervical block anesthesia. While EXPAREL has not been studied with this technique, the use of bupivacaine for obstetrical paracervical block anesthesia has resulted in fetal bradycardia and death.

Bupivacaine can rapidly cross the placenta, and when used for epidural, caudal, or pudendal block anesthesia, can cause varying degrees of maternal, fetal, and neonatal toxicity. The incidence and degree of toxicity depend upon the procedure performed, the type, and amount of drug used, and the technique of drug administration. Adverse reactions in the parturient, fetus, and neonate involve alterations of the central nervous system, peripheral vascular tone, and cardiac function.

**Data**

**Animal Data**

Bupivacaine hydrochloride was administered subcutaneously to rats and rabbits during the period of organogenesis (implantation to closure of the hard plate). Rat doses were 4.4, 13.3, and 40 mg/kg/day (equivalent to 0.2, 0.5 and 1.5 times the MRHD, respectively, based on the BSA comparisons and a 60 kg human weight) and rabbit doses were 1.3, 5.8, and 22.2 mg/kg/day (equivalent to 0.1, 0.4 and 1.6 times the MRHD, respectively, based on the BSA comparisons and a 60 kg human weight). No embryo-fetal effects were observed in rats at the doses tested with the high dose causing increased maternal lethality. An increase in embryo-fetal deaths was observed in rabbits at the high dose in the absence of maternal toxicity.

Decreased pup survival was noted at 1.5 times the MRHD in a rat pre- and post-natal development study when pregnant animals were administered subcutaneous doses of 4.4, 13.3, and 40 mg/kg/day buprenorphine hydrochloride (equivalent to 0.2, 0.5 and 1.5 times the MRHD, respectively, based on the BSA comparisons and a 60 kg human weight) from implantation through weaning (during pregnancy and lactation).

**Lactation**

**Risk Summary**

Limited published literature reports that bupivacaine and its metabolite, pipercoloxylidide, are present in human milk at low levels. There is no available information on effects of the drug in the breastfed infant or effects of the drug on milk production. The developmental and health benefits of breastfeeding should be considered along with the mother's clinical need for EXPAREL and any potential adverse effects on the breastfed infant from EXPAREL or from the underlying maternal condition.

**Pediatric Use**

Safety and effectiveness in pediatric patients have not been established.

**Geriatric Use**

Of the total number of patients in the EXPAREL local infiltration clinical studies (N=823), 171 patients were greater than or equal to 65 years of age and 47 patients were greater than or equal to 75 years of age. Of the total number of patients in the EXPAREL nerve block clinical studies (N=531), 241 patients were greater than or equal to 65 years of age and 60 patients were greater than or equal to 75 years of age. No overall differences in safety or effectiveness were observed between these patients and younger patients. Clinical experience with EXPAREL has not identified differences in efficacy or safety between elderly and younger patients, but greater sensitivity of some older individuals cannot be ruled out.

**Hepatic Impairment**

Amide-type local anesthetics, such as bupivacaine, are metabolized by the liver. Patients with severe hepatic disease, because of their inability to metabolize local anesthetics normally, are at a greater risk of developing toxic plasma concentrations, and potentially local anesthetic systemic toxicity. Therefore, consider increased monitoring for local anesthetic systemic toxicity in subjects with moderate to severe hepatic disease.

**Renal Impairment**

Bupivacaine is known to be substantially excreted by the kidney, and the risk of toxic reactions to this drug may be greater in patients with impaired renal function. This should be considered when performing dose selection of EXPAREL.

**OVERDOSAGE**

**Clinical Presentation**

Acute emergencies from local anesthetics are generally related to high plasma concentrations encountered during therapeutic use of local anesthetics or to unintended intravascular injection of local anesthetic solution.

Signs and symptoms of overdose include CNS symptoms (perioral paresthesia, dizziness, dysarthria, confusion, mental obtundation, sensory and visual disturbances and eventually convulsions) and cardiovascular effects (that range from hypertension and tachycardia to myocardial depression, hypotension, bradycardia and asystole).

Plasma levels of bupivacaine associated with toxicity can vary. Although concentrations of 2,500 to 4,000 ng/mL have been reported to elicit early subjective CNS symptoms of bupivacaine toxicity, symptoms of toxicity have been reported at levels as low as 800 ng/mL.

**Management of Local Anesthetic Overdose**

At the first sign of change, oxygen should be administered.

The first step in the management of convulsions, as well as underventilation or apnea, consists of immediate attention to the maintenance of a patent airway and assisted or controlled ventilation with oxygen and a delivery system capable of permitting immediate positive airway pressure by mask. Immediately after the institution of these ventilatory measures, the adequacy of the circulation should be evaluated, keeping in mind that drugs used to treat convulsions sometimes depress the circulation when administered intravenously. Should convulsions persist despite adequate respiratory support, and if the status of the circulation permits, small increments of an ultra-short acting barbiturate (such as thiopental or thiamylal) or a benzodiazepine (such as diazepam) may be administered intravenously. The clinician should be familiar, prior to the use of anesthetics, with these anticonvulsant drugs. Supportive treatment of

circulatory depression may require administration of intravenous fluids and, when appropriate, a vasopressor dictated by the clinical situation (such as epinephrine to enhance myocardial contractile force).

If not treated immediately, both convulsions and cardiovascular depression can result in hypoxia, acidosis, bradycardia, arrhythmias and cardiac arrest. If cardiac arrest should occur, standard cardiopulmonary resuscitative measures should be instituted.

Endotracheal intubation, employing drugs and techniques familiar to the clinician, maybe indicated, after initial administration of oxygen by mask, if difficulty is encountered in the maintenance of a patent airway or if prolonged ventilatory support (assisted or controlled) is indicated.

**DOSEAGE AND ADMINISTRATION**

**Important Dosage and Administration Information**

- EXPAREL is intended for single-dose administration only.
- Different formulations of bupivacaine are not bioequivalent even if the milligram strength is the same. Therefore, it is not possible to convert dosing from any other formulations of bupivacaine to EXPAREL.
- DO NOT dilute EXPAREL with water for injection or other hypotonic agents, as it will result in disruption of the liposomal particles.
- Use suspensions of EXPAREL diluted with preservative-free normal (0.9%) saline for injection or lactated Ringer's solution within 4 hours of preparation in a syringe.
- Do not administer EXPAREL if it is suspected that the vial has been frozen or exposed to high temperature (greater than 40°C or 104°F) for an extended period.
- Inspect EXPAREL visually for particulate matter and discoloration prior to administration, whenever solution and container permit. Do not administer EXPAREL if the product is discolored.

**Recommended Dosing in Adults**

**Local Analgesia via Infiltration**

The recommended dose of EXPAREL for local infiltration in adults is up to a maximum dose of 266mg (20 mL), and is based on the following factors:

- Size of the surgical site
- Volume required to cover the area
- Individual patient factors that may impact the safety of an amide local anesthetic

As general guidance in selecting the proper dosing, two examples of infiltration dosing are provided:

- In patients undergoing bunionectomy, a total of 106 mg (8 mL) of EXPAREL was administered with 7 mL infiltrated into the tissues surrounding the osteotomy, and 1 mL infiltrated into the subcutaneous tissue.
- In patients undergoing hemorrhoidectomy, a total of 266 mg (20 mL) of EXPAREL was diluted with 10 mL of saline, for a total of 30 mL, divided into six 5 mL aliquots, injected by visualizing the anal sphincter as a clock face and slowly infiltrating one aliquot to each of the even numbers to produce a field block.

**Regional Analgesia via Interscalene Brachial Plexus Nerve Block**

The recommended dose of EXPAREL for interscalene brachial plexus nerve block in adults is 133 mg (10 mL), and is based upon one study of patients undergoing either total shoulder arthroplasty or rotator cuff repair.

**Compatibility Considerations**

Admixing EXPAREL with drugs other than bupivacaine HCl prior to administration is not recommended.

- Non-bupivacaine based local anesthetics, including lidocaine, may cause an immediate release of bupivacaine from EXPAREL if administered together locally. The administration of EXPAREL may follow the administration of lidocaine after a delay of 20 minutes or more.
- Bupivacaine HCl administered together with EXPAREL may impact the pharmacokinetic and/or physicochemical properties of EXPAREL, and this effect is concentration dependent. Therefore, bupivacaine HCl and EXPAREL may be administered simultaneously in the same syringe, and bupivacaine HCl may be injected immediately before EXPAREL as long as the ratio of the milligram dose of bupivacaine HCl solution to EXPAREL does not exceed 1:2.

The toxic effects of these drugs are additive and their administration should be used with caution including monitoring for neurologic and cardiovascular effects related to local anesthetic systemic toxicity.

- When a topical antiseptic such as povidone iodine (e.g., Betadine®) is applied, the site should be allowed to dry before EXPAREL is administered into the surgical site. EXPAREL should not be allowed to come into contact with antiseptics such as povidone iodine in solution.

Studies conducted with EXPAREL demonstrated that the most common implantable materials (polypropylene, PTFE, silicone, stainless steel, and titanium) are not affected by the presence of EXPAREL any more than they are by saline. None of the materials studied had an adverse effect on EXPAREL.

**Non-Interchangeability with Other Formulations of Bupivacaine**

Different formulations of bupivacaine are not bioequivalent even if the milligram dosage is the same. Therefore, it is not possible to convert dosing from any other formulations of bupivacaine to EXPAREL and vice versa.

Liposomal encapsulation or incorporation in a lipid complex can substantially affect a drug's functional properties relative to those of the unencapsulated or nonlipid-associated drug. In addition, different liposomal or lipid-complexed products with a common active ingredient may vary from one another in the chemical composition and physical form of the lipid component. Such differences may affect functional properties of these drug products. Do not substitute.

**CLINICAL PHARMACOLOGY**

**Pharmacokinetics**

Administration of EXPAREL results in significant systemic plasma levels of bupivacaine which can persist for 96 hours after local infiltration and 120 hours after interscalene brachial plexus nerve block. In general, peripheral nerve blocks have shown systemic plasma levels of bupivacaine for extended duration when compared to local infiltration. Systemic plasma levels of bupivacaine following administration of EXPAREL are not correlated with local efficacy.

**PATIENT COUNSELING**

Inform patients that use of local anesthetics may cause methemoglobinemia, a serious condition that must be treated promptly. Advise patients or caregivers to seek immediate medical attention if they or someone in their care experience the following signs or symptoms: pale, gray, or blue colored skin (cyanosis); headache; rapid heart rate; shortness of breath; lightheadedness; or fatigue.

DELAYED TIME TO FIRST  
OPIOID RESCUE:

0.25 to 48

HOURS WITH EXPAREL  
0.27 TO 33 HOURS WITH  
STANDARD BUPIVACAINE HCl

OMFS, oral/maxillofacial surgery.

Results from a phase 4, double-blind, randomized, active-controlled, parallel-group study that compared the efficacy and safety of EXPAREL 266 mg (20 mL) (n=70) with bupivacaine HCl 0.5% (n=69) in a total knee arthroplasty. Primary end points: area under the curve of visual analog scale pain intensity scores 12 to 48 hours postsurgery and total opioid consumption 0 to 48 hours postsurgery. Rescue opioids for pain were available upon patient request. Rates and types of adverse events were similar between treatment groups. The most common adverse events in the EXPAREL group were nausea, muscle spasms, and vomiting.<sup>3</sup>

\*The clinical benefit of the decrease in opioid consumption was not demonstrated in the pivotal trials.

## Indication

EXPAREL is indicated for single-dose infiltration in adults to produce postsurgical local analgesia and as an interscalene brachial plexus nerve block to produce postsurgical regional analgesia. Safety and efficacy have not been established in other nerve blocks.

## Important Safety Information

EXPAREL is contraindicated in obstetrical paracervical block anesthesia. Adverse reactions reported with an incidence greater than or equal to 10% following EXPAREL administration via infiltration were nausea, constipation, and vomiting; adverse reactions reported with an incidence greater than or equal to 10% following EXPAREL administration via interscalene brachial plexus nerve block were nausea, pyrexia, and constipation. If EXPAREL and other non-bupivacaine local anesthetics, including lidocaine, are administered at the same site, there may be an immediate release of bupivacaine from EXPAREL. Therefore, EXPAREL may be administered to the same site 20 minutes after injecting lidocaine. EXPAREL is not recommended to be used in the following patient population: patients <18 years old and/or pregnant patients. Because amide-type local anesthetics, such as bupivacaine, are metabolized by the liver, EXPAREL should be used cautiously in patients with hepatic disease.

**Warnings and Precautions Specific to EXPAREL:** Avoid additional use of local anesthetics within 96 hours following administration of EXPAREL. EXPAREL is not recommended for the following types or routes of administration: epidural, intrathecal, regional nerve blocks **other than interscalene brachial plexus nerve block**, or intravascular or intra-articular use. The potential sensory and/or motor loss with EXPAREL is temporary and varies in degree and duration depending on the site of injection and dosage administered and may last for up to 5 days, as seen in clinical trials.

## Warnings and Precautions for Bupivacaine-Containing Products

**Central Nervous System (CNS) Reactions:** There have been reports of adverse neurologic reactions with the use of local anesthetics. These include persistent anesthesia and paresthesia. CNS reactions are characterized by excitation and/or depression. **Cardiovascular System Reactions:** Toxic blood concentrations depress cardiac conductivity and excitability which may lead to dysrhythmias, sometimes leading to death. **Allergic Reactions:** Allergic-type reactions (eg, anaphylaxis and angioedema) are rare and may occur as a result of hypersensitivity to the local anesthetic or to other formulation ingredients. **Chondrolysis:** There have been reports of chondrolysis (mostly in the shoulder joint) following intra-articular infusion of local anesthetics, which is an unapproved use. **Methemoglobinemia:** Cases of methemoglobinemia have been reported with local anesthetic use.
