To single-owner oral surgeons considering retirement or buyout: Instead of selling to private equity at 1X EBITDA and putting patients in the hands of investors, OMS Consulting offers an alternative solution that allows an OS to maintain ownership as a passive income source and continue the employment of their staff. OMS Consulting is an oral surgeon-owned organization, which allows us to focus more on the patient experience. We provide an oral surgeon and nurses, who visit the clinic frequently enough to manage the patient volume of the practice. Clinics must have gross collections of \$2.5M-plus to be considered. Owners receive 40 percent of collections, resulting in more income than would be possible with an acquisition, while also preserving standard of care, ownership of the asset and the right to eventually sell the practice in the future.
