

# Speaker Marketing Toolkit

**This toolkit is intended to help you promote your participation in the 2026 AAOMS Annual Meeting.**

By using one or more of the elements of this toolkit, you will help AAOMS promote registration for the meeting being held Sept. 30 to Oct. 3 in Seattle, Wash. While AAOMS continues its traditional outreach, marketing is about reaching the right audiences with the right messages in the right format. **That's why AAOMS is asking for your help – a speaker's circle of contacts can prove to be indispensable.**

This toolkit allows you to announce your upcoming presentation(s) to your professional network in a simple and "branded" way – as all speakers are offered the same materials.

**Speakers are invited to promote their involvement in the AAOMS Annual Meeting in these ways:**

- **Use downloadable graphics.**
- **Invite colleagues via a personalized email.**
- **Send an item to your state or regional OMS society.**
- **Add a temporary email signature.**
- **Share on social media platforms that have your professional connections.**
- **Create and post a short promotional video.**

Questions about how to use this toolkit?

## Promotional video

Videos are a great way to increase interest in your session. These tips explain what the video should focus on and where to post it:

- Highlight your session topic and key objectives of your presentation.
- Promote the session title, date, time and any co-presenters.
- Keep it concise – 60-90 seconds is ideal.
- Share your video on your social media accounts with professional connections. Don't forget to use the meeting hashtag #AAOMS2026.
- Send the video to AAOMS too! Email the video to [kswihart@aaoms.org](mailto:kswihart@aaoms.org) for potential placement on AAOMS social media and website.

## Advice for shooting a video from a phone

- **Choose your location based on lighting and background** – For indoor videos, position yourself facing a window. Turn on other indoor lights. A simple background is best.
- **Configure the resolution** – A higher resolution will produce smoother, crisper videos. Check your phone manual for assistance on how to adjust the resolution. General instructions for an iPhone are Go to Settings > Camera > Record Video > select 4K at 60 fps. For an Android phone, go to your Camera app > Settings > Video Quality > select Full HD.
- **Turn the phone so it's positioned horizontally** – This will avoid black bars added on the sides during playback.
- **Use a tripod** – If you don't own a tripod, you can easily create one using a paper cup, flexible "reward" cards or binder clips ([YouTube.com/watch?v=TTtJovKtujo](https://www.youtube.com/watch?v=TTtJovKtujo)).
- **Move the phone closer and closer until you find the ideal frame for the video** – Don't use the zoom-in feature as that causes the video to become pixelated.
- **Sound enhancements** – Turn off fans and other white noise. If the phone is close enough and the room is quiet, the audio should be acceptable.
- **Preparing to present** – It is best to write and rehearse a script but not read from it while recording. Instead, set up a laptop/tablet next to the camera so you can see an outline of the major bullet points to guide you while speaking.
